## Abstracts

The gradual evolution of vending machines from those that operated with tokens to newer ones which accept coins, credit or debit cards and other alternative payment methods is fuelling the slow growth of sales through this channel. However, most of the 5,000 vending machines operating in Uruguay are located in captive environments, with only a very small percentage being included in this report.

Euromonitor International's Vending in Uruguay report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Hot Drinks Vending, Other Products Vending, Packaged Drinks Vending, Packaged Foods Vending, Personal Hygiene Products Vending, Tobacco Products Vending, Traditional Toys and Games Vending.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
