Abstracts

Vending continued to see positive growth in Denmark in 2023. However, this was largely a correction as the category saw a strong decline during the COVID-19 crisis. The fact that consumers are once again spending more time outside and exercising, commuting to work and so on, has had a positive impact on vending consumption. Nonetheless, at the end of the review period, vending sales remained significantly below the levels seen prior to the outbreak of COVID-19.

Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers.
