Abstracts

As wearable electronics continues to evolve, a marked and persistent shift from basic activity bands to more sophisticated activity watches and smart wearables is being observed in Indonesia. Smart wearables and advanced activity watches offer a wide spectrum of features that transcend the basic functionality of fitness trackers. They provide GPS tracking, music control, contactless payment options and the facility to install various apps catering to diverse needs. This versatility gives them an...

Euromonitor International's Wearable Electronics in Indonesia report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
