Abstracts

Smart homes and smart cities are becoming more widespread thanks to growing smartphone and internet use. Data-driven decision making is helping to improve the efficiency of homes and cities, enabling a more sustainable mode of living that discourages wastefulness. Still, major challenges persist such a cost of investment and data regulations are stemming growth. Despite COVID-19's detrimental impact to the global economy, smart solutions will continue to become more abundant in the long run.

...

Euromonitor International's Which Comes First: Smart Home or Smart City? global briefing offers insight on emerging geographies, key growth categories and trends as well as pressing industry issues and white spaces. It identifies the leading companies and brands, and offers strategic analysis of key factors influencing the market – be it new product developments, economic/lifestyle influences, distribution or pricing issues. From the latest innovations such as Smartphones, Ultrabooks and OLED TVs to existing technologies such as Laptops, Home Audio and Cinema Systems and In-Car Entertainment, Euromonitor International offers a consistent yet incisive snapshot of the Consumer Electronics industry. Forecasts illustrate how the market is set to change and the criteria for success over the next five years.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
