Abstracts

Business operations are increasingly paying attention to environmental indicators impacting the supply chains and manufacturing process as well as consumer demands when taking strategic decisions. This report identifies eight key natural resources themes that are expected to stay relevant in the long-term, and are important for understanding operational and environmental risks. These include water risks, climate change, and commodity price volatility.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
