## Abstracts

COVID-19 led to global automotive sales plummeting by 16% in 2020, as lockdowns curtailed business and consumer activity. Passenger vehicle sales will, however, recover and grow by 28% over 2020-2025. Shared mobility was also squeezed, with gross bookings dropping by 30%. Ride hailing and ridesharing were most affected, while micro-mobility better weathered the drop, as more people turned to solo mobility. Over 2020-2025, shared mobility gross bookings will double in constant value terms.

Euromonitor International's new Automotive reports are designed specifically for stakeholders in the automotive industry and are compiled from Euromonitor's unrivalled range of global macro-economic and consumer intelligence.
