Abstracts

There is expected to be moderate current value and volume growth for yoghurt in 2023. Local production ensures affordable prices and stable supply. That being said, smaller offerings of 100ml are more popular in 2023, as it is less of a financial outlay. This is especially true through traditional channels. Value sales for sour milk products through official channels are still expected to be low.

Euromonitor International's Yoghurt and Sour Milk Products in Kenya report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
