Abstracts

3D Printing / Additive Manufacturing Market was valued at USD \$300 million in 2026 and is projected to reach USD \$1.80 billion by 2035, registering a CAGR of 22.0% across the forecast period. The 3D Printing / Additive Manufacturing Market continues to expand as rising cross-industry adoption, expanding regulatory clarity, and growing capital investment across both developed and emerging markets reshape demand across the value chain.

“Hardware is projected to hold the largest share of the 3D Printing / Additive Manufacturing Market through 2035.” This segment continues to gain traction owing to strong existing adoption, favorable total cost of ownership, and vendors bundling advisory and integration services around it to lengthen customer relationships within the 3D Printing / Additive Manufacturing Market.

“Large Enterprises is likely to remain the leading end-user segment of the 3D Printing / Additive Manufacturing Market.” Budget cycles among these buyers are lengthening as procurement teams weigh total cost of ownership more heavily than upfront price, reshaping how vendors package and price 3d printing / additive

manufacturing offerings for 2026-2035.

“Asia-Pacific is projected to be the fastest-growing region in the 3d printing / additive manufacturing market between 2026 and 2035.” Asia-Pacific outpaces other regions on the back of rapid industrialization, expanding middle-class consumption, and large-scale government-backed infrastructure investment.
