Abstracts

Agriculture Technology (AgriTech) Market was valued at USD \$600 million in 2026 and is projected to reach USD \$1.95 billion by 2035, registering a CAGR of 14.0% across the forecast period. The Agriculture Technology (AgriTech) Market continues to expand as rising cross-industry adoption, expanding regulatory clarity, and growing capital investment across both developed and emerging markets reshape demand across the value chain.

“Agriculture Technology (AgriTech) – Standard Grade is projected to hold the largest share of the Agriculture Technology (AgriTech) Market through 2035.”

This segment continues to gain traction owing to strong existing adoption, favorable total cost of ownership, and vendors bundling advisory and integration services around it to lengthen customer relationships within the Agriculture Technology (AgriTech) Market.

“Manufacturing is likely to remain the leading end-user segment of the Agriculture Technology (AgriTech) Market.” Budget cycles among these buyers are lengthening as procurement teams weigh total cost of ownership more heavily than upfront price, reshaping how vendors package and price agriculture technology (agritech) offerings for 2026-2035.

“North America is projected to be the fastest-growing region in the agriculture technology (agritech) market between 2026 and 2035.” North America outpaces other regions on the back of established regulatory frameworks, high per-capita technology spend, and early adoption by large enterprises.
