ABO, Kell, MNS, and Rhesus blood group antigens). The RhD and the ABO blood group systems are the key essential blood groups in blood transfusions. Blood classes are identified by either a protein or a molecule (carbohydrate) like the ABO antigens of blood group or several other antigens on the surface of the human red blood cell.

MARKET HIGHLIGHTS

Blood Grouping Reagents Market is expected to reach USD 2.9 billion, growing at a CAGR of 8.4% during the forecast period owing to the rising demand for blood group typing and blood transfusions and growing cases of emergencies like road accidents. Moreover, the mounting penetration of healthcare and associated facilities is anticipated to boost the growth of the Blood Grouping Reagents Market over the forecast period.
