Carbon Capture, Utilization and Storage (CCUS) Market was valued at USD \$1.92 billion in 2026 and is projected to reach USD \$6.49 billion by 2035, registering a CAGR of 14.5% across the forecast period. The Carbon Capture, Utilization and Storage (CCUS) Market continues to expand as rising cross-industry adoption, expanding regulatory clarity, and growing capital investment across both developed and emerging markets reshape demand across the value chain.

“Equipment is projected to hold the largest share of the Carbon Capture, Utilization and Storage (CCUS) Market through 2035.” This segment continues to gain traction owing to strong existing adoption, favorable total cost of ownership, and vendors bundling advisory and integration services around it to lengthen customer relationships within the Carbon Capture, Utilization and Storage (CCUS) Market.

“Power Generation is likely to remain the leading end-user segment of the Carbon Capture, Utilization and Storage (CCUS) Market.” Budget cycles among these buyers are lengthening as procurement teams weigh total cost of ownership more

heavily than upfront price, reshaping how vendors package and price carbon capture, utilization and storage (ccus) offerings for 2026-2035.

“Europe is projected to be the fastest-growing region in the carbon capture, utilization and storage (ccus) market between 2026 and 2035.” Europe outpaces other regions on the back of supportive regulatory mandates, sustainability-linked procurement policies, and a mature industrial buyer base.
