Global Web Conferencing Market: Impact of COVID-19

Global pandemic COVID-19 has become global stress, not just for human lives, but also for industries across different industry verticals. The COVID-19 disease has infected several million people globally, with an increasing number of active cases daily, the duration of the pandemic is still difficult to predict. In the space of only a few months, there has been a major increase in web conferencing. The current COVID-19 situation has far more people working from home than ever before, prompting businesses to use video conferencing as their primary means of employee communication. And with much of the planet on lockdown and social distancing steps in place, even spending time with friends and family is now largely limited to video calls. From birthday parties for children to corporate meetings with high stakes, online conferencing and video call systems are now being used globally which is spurring the demand for the web conferencing industry. Although there is nothing that replaces in-person communication, there are many things that can be done quickly and easily through web conferencing, so it is anticipated that even in the post-COVID-19 period the use of these platforms will continue to proliferate.
