PRODUCT OVERVIEW

Device as a Service Market is projected to grow at a CAGR of 28% in the forecast period (2022-2032), with the market size valued at USD 57.96 billion in 2022 and expected to reach USD 686.2 billion by 2032.

Device as a Service (DaaS) refers to a subscription-based model that provides

access to hardware devices, such as computers, laptops, smartphones, and other equipment. It offers associated services that meet the demand of individuals and organizations, such as software, maintenance, and support. DaaS is a modern approach that transforms how organizations manage their technological resources. It enables businesses to rent multiple hardware and software services via a subscription model. This approach provides several benefits, including predictable costs, scalability, and access to modern technology without the need for upfront capital investments.

MARKET HIGHLIGHTS

Device as a Service Market is anticipated to reach USD 686.2 billion, growing at a CAGR of 28% during the forecast period, owing to the rising demand for economical and flexible IT solutions across organisations. The growth can be attributed to several factors such as the increasing adoption of subscription-based services and the need for efficient asset management within industries. Small and medium-sized enterprises (SMEs) are notably adopting DaaS as it offers latest technologies while minimizing initial capital expenditure. The demand for flexibility in business procedures combined with the evolving digital ecosystem is expected to promote growth and innovation in the DaaS industry.
