## Abstracts

### Market Overview

Over the last several years, businesses all over the world have been attempting to satisfy consumer needs by leveraging the digitization of services, which has expanded the number and variety of devices that may access digital services, including smartphones, tablets, wearables, and IoT devices. As a result of the increase in gadgets, it is becoming increasingly necessary for organizations to defend themselves from escalating security risks in order to maintain business operations secure and efficient. Businesses may utilize FIDO Authentication to fulfil the requirement for secure applications without sacrificing user comfort. Organizations may eliminate weak links in the authentication chain, such as traditional passwords, by using FIDO authentication solutions and services, and deliver better security and customer experience through password less authentication. Endpoints and servers must conform with operating procedures, regulations, and security rules in today's resource-strapped IT departments. In addition, the market for FIDO Authentication is growing due to the increasing usage of digital solutions and technology.
