## **Abstracts**

Fruit and Vegetable Processing Market By Type (Fruits, Vegetables), By Product Type (Fresh, Fresh-cut, Canned, Frozen, Dried), By Processing Equipment (Pre-processing, Processing, Washing, Filling, Seasoning, Packaging), And Region – Global Analysis of Market Size, Share & Trends For 2019–2021 And Forecasts To 2031

### **PRODUCT OVERVIEW.**

Food processing extends the shelf life of fruits and vegetables through canning, freezing, drying, and preparing jams, juices, and jellies. Cleaning, cutting, and peeling the raw material are the first steps in the processing process, followed by canning, cooking, or freezing. The operation of a plant is frequently seasonal. Large volumes of solid waste and effluents are common in the fruit and vegetable industry. High organic loads, salt, cleansing and blanching agents, and suspended solids such as fibers and soil particles are also present in the effluents. Pesticide residues from the raw components may also be present. Organic products, such as rejected fruits and vegetables, make up the majority of solid trash.

### **MARKET HIGHLIGHTS**

Global Fruit & Vegetable Processing Market is projected to register a notable CAGR of 7.2% by 2031

Global Fruit & Vegetable Processing Market to surpass USD 615.8 billion by 2031 from USD 306 billion in 2021 at a CAGR of 7.2% in the coming years, i.e., 2021-2031. Increased demand for ready-to-eat and on-the-go food items has resulted in market growth. Also, a rise in the need for convenience due to hectic customer lifestyles and an increase in per-capita income are a few other factors. As a result, there has been an increase in demand for processed foods. Because of the industry's rapid growth, the forecast for the fruit and vegetable processing market is predicted to stay good.

## GLOBAL FRUIT & VEGETABLE PROCESSING MARKET: SEGMENTS

Fruit segment is predicted to witness significant growth during 2021-31

On the basis of type, the Fruit and Vegetable Processing Market is categorized into fruits and vegetables. During the forecast period, the fruit segment is expected to grow at the fastest CAGR. Because of the growing preference for healthy foods such as organic, ready-to-eat fruits, the segment is expected to grow significantly. Customers are urged to choose fruit items that are widely available and much tastier, such as fruit juices, as they become more health-conscious.

Fresh segment is expected to lead the market with the highest CAGR during 2021-31

On the basis of product, the Fruits and Vegetables Processing Market is divided into Fresh, Fresh-cut, Canned, Frozen, and Dried. In the fruit and vegetable processing industry, the fresh segment is expected to have the highest share. The rising demand for ready-to-cook produce is to blame for the increase. As a result of busy consumer lives, the market for processed fruits and vegetables is likely to be driven by demand for convenience foods, increased health consciousness, demand for fresh and fresh-cut fruits and vegetables that save the time for preparation, and convenient storage and longer shelf life.

## MARKET DYNAMICS
