## **PRODUCT OVERVIEW**

The Global Food Packaging Tester Market was valued at million USD in 2021 expected to reach million USD by 2032

Food Packaging Tester is a machinery required to test the strength and durability of food packaging. This machine is utilized to test the ability of packaging to withstand all the external forces acting on the material during transportation and while storage. The food packaging tester is also used to test the ability of packaging to withstand food from being spoiled.

## MARKET HIGHLIGHTS

The Global Food Packaging Tester Market was valued at million USD in 2021 expected to reach million USD by 2032, increasing at a CAGR of 6.76% during the forecast period, i.e., 2022-2032 owing to the rising awareness of people on the requirement of the food packaging material, their quality aiming to deliver food safely. Food packaging Tester market is also expected to grow as the packaging will avoid the change in the composition of the food by maintaining the aroma or taste of the food intact without turning into an unacceptable state. The concern on health has increased and the hazard of migration of chemical from package material to food products is monitored by implementing strict regulation to adhere with packaging testing requirements and norms.
