Abstracts

Market Overview

The griddles are a large flat surface composed of aluminum, chrome steel, and carbon steel that is used for cooking. Electricity, gas, coal, and wood are used to heat the griddles for home and commercial use. Griddles are classified into three categories: conventional, domestic, and commercial. Stone slabs or tablet-like structures are used in traditional griddles. Griddles for household use are often composed of stainless steel, wrought iron, or carbon steel. These home griddles are lightweight and durable, making them ideal for light-duty cooking. Commercial countertop griddles are used in restaurants, hotels, cafés, and other establishments. Consumers choose industrial griddles with thermostat controls because they give the capabilities to change the temperature properly and allow the consumer to set the correct cooking temperature for various food products based on their requirements. Griddles are commonly used in hotels, restaurants, and cafés since they are a flexible and multifunctional equipment that may be used for cooking.

Growth Factor

Growing trend of outdoor cooking

Backyard or outdoor cooking is becoming increasingly popular and popular. This new trend has contributed significantly to the rise of outdoor cooking equipment such as griddles. In Western countries, the notion of outdoor cooking is well-known. The ancestors have followed this custom of outside cooking for centuries. On important occasions and festivities, people like to cook outside. In South Asia and East Asia, such outdoor cooking practices are steadily gaining popularity. Such customs are likely to promote market expansion in the future years.
