PRODUCT OVERVIEW

Hospital Linen Supply and Management Services Market size was USD 14.36 billion in 2021 and projected to grow from USD 17.9 billion in 2023 to USD 48.9 billion by 2032, exhibiting a CAGR of 11.8% during the forecast period.

Hospital linen is any cloth that is only used in hospitals and that needs to be cleaned (laundry) before being reused. They are crucial in preventing the spread of germs among patients and provide patients with more ease and comfort. Precisely, linen management simply means getting the correct product, at the right time, at the right place, and in the right amount.

MARKET HIGHLIGHTS

Hospital Linen Supply and Management Services market is expected to reach USD 48.9 billion, growing at a CAGR of 11.8% during the forecast period owing to the increased number of surgical operations on the global scale. Hospital gowns are a necessity for surgical procedures and therefore anticipated to witness strong demand over the forecast period. Surgery professionals frequently advise patients to wear patient gowns since they can, to some extent, protect against HAIs (infections). These factors are majorly impacting the market growth.
