## **Abstracts**

HPV Testing and Pap Test Market: By Product Type (HPV test, Pap test and Co-test); By Application (Cervical cancer and Vaginal cancer); By Distribution Channel (Hospitals and clinics, Diagnostic centers and Others), And Region – Global Analysis of Market Size, Share & Trends For 2021–2022 And Forecasts To 2032

## **PRODUCT OVERVIEW**

The most prevalent sexually transmitted infection in the world is caused by the papillomaviridae family's Human Papillomavirus (HPV). HPV is divided into two categories, such as low-risk HPVs and high-risk HPVs, depending on the risk involved. Cervical and vaginal cancers are now well known to be caused by high-risk strains of the HPV virus. A double-stranded DNA tumour virus called the human papillomavirus promotes the growth of epithelial cells on the cutaneous and mucosal surfaces.

## **MARKET HIGHLIGHTS**

The HPV Testing and Pap Test Market is expected to project a notable CAGR of 7.4% in 2032.

HPV Testing and Pap Test Market is expected to surpass USD 9.10 billion by 2032 from USD 2.99 billion in 2021 at a CAGR of 7.4% in the coming years, i.e., 2022-32. Rising demand for technologically sophisticated diagnostic procedures for screening cervical and vaginal cancers is one of the main factors anticipated to propel the market for human papillomavirus testing and Pap tests over the forecast period. The market for Pap tests and human papillomavirus testing is anticipated to be driven by a number of technological developments, such as the creation of human papillomavirus type 16 and the use of various molecular markers in screening techniques.

## HPV TESTING AND PAP TEST MARKET: SEGMENTS

The pap test segment is expected to grow with a higher CAGR during 2022-32

HPV Testing and Pap Test Market is categorized on the basis of Product Type into HPV test, Pap test and Co-test. Due to its extensive adoption in screening programs, the Pap test segment led the market for HPV testing and Pap tests in 2021. Further measures to raise public knowledge about Pap tests are anticipated to fuel the segment's expansion. Initial screening using HPV tests aids in finding abnormal cells that could develop into cancer. This aids in the early detection of disease and enables medical professionals to choose from a variety of preventive and/or therapeutic measures. As a result, it is projected that the HPV testing market would expand over the forecast period.

The hospital segment is expected to grow with a higher CAGR during 2022-32

HPV Testing and Pap Test Market is categorized on the basis of distribution channel into Hospitals and clinics, Diagnostic centers and Others. With an increase in patient load, pap test and HPV testing procedures will become more common in hospitals. Healthcare spending is rising as a result of an increased availability of cutting-edge equipment, the presence of skilled personnel, and a booming demand for relatively inexpensive diagnostic procedures. The availability of well-equipped assays and test kits for the detection of cervical and vaginal cancer in both public and private institutions, as well as the influx of numerous sophisticated technologies, will encourage the market's expansion.

## Competition & Companies Involved in the Market

### Reasons to Purchase this Report

Qualitative and quantitative analysis of the market based on segmentation involving both economic as well as non-economic factors

Provision of market value (USD Billion) data for each segment and sub-segment

Indicates the region and segment that is expected to witness the fastest growth as well as to dominate the market

Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region

Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled

Extensive company profiles comprising of company overview, company insights, product benchmarking, and SWOT analysis for the major market players

The current as well as the future market outlook of the industry with respect to recent developments which involve growth opportunities and drivers as well as challenges and restraints of both emerging as well as developed regions

Includes in-depth analysis of the market of various perspectives through Porter's five forces analysis

Provides insight into the market through Value Chain

Market dynamics scenario, along with growth opportunities of the market in the years to come

3-month post-sales analyst support.
