Abstracts

Industrial Automation Market was valued at USD \$960 million in 2026 and is projected to reach USD \$2.66 billion by 2035, registering a CAGR of 12.0% across the forecast period. The Industrial Automation Market continues to expand as rising cross-industry adoption, expanding regulatory clarity, and growing capital investment across both developed and emerging markets reshape demand across the value chain.

“Equipment is projected to hold the largest share of the Industrial Automation Market through 2035.” This segment continues to gain traction owing to strong existing adoption, favorable total cost of ownership, and vendors bundling advisory and integration services around it to lengthen customer relationships within the Industrial Automation Market.

“Automotive is likely to remain the leading end-user segment of the Industrial Automation Market.” Budget cycles among these buyers are lengthening as procurement teams weigh total cost of ownership more heavily than upfront price, reshaping how vendors package and price industrial automation offerings for 2026-2035.

“North America is projected to be the fastest-growing region in the industrial

automation market between 2026 and 2035.” North America outpaces other regions on the back of established regulatory frameworks, high per-capita technology spend, and early adoption by large enterprises.
