Infection Control Market By Product Type (Equipment, Disinfectors, Sterilization Equipment, Services, Consumables); By end user (hospitals, medical device companies, pharmaceuticals companies, research centers and others); and Region -Analysis of Market Size, Share & Trends for 2016 - 2019 and Forecasts to 2030.

PRODUCT OVERVIEW

Infection Control refers to the elimination of all types of microorganisms from objects and surfaces to ensure that the object/surface is sterile, so that they are safe for human consumption/reuse and to avoid contamination, as well as disease transmission. The sector of infection control includes the different products and services in hospitals and clinics as well as in the food, medical device, and life sciences for the purification, disinfecting, and sterilization of the objects/surface. In hospitals and clinics, infection prevention and control is of vital importance in preventing the spread of infections in medical facilities. 1 out of 10 patients gets an infection when they seek treatment, according to data from the World Health Organization.

MARKET HIGHLIGHTS

Infection Control Market is expected to project a CAGR of 4.60% during the forecast period, 2021-2030

Factors such as the high incidence of hospital infections; increased operating procedures; the rising geriatric population and increasing prevalence of chronic diseases; an increasing focus on food sterilization and disinfection; technological advancements in sterilization equivalents; and rising outsourcing of sterilization services among pharmaceutical companies, hospitals, and medical equipment producers can be attributed to the growth of the market.

INFECTION CONTROL MARKET: SEGMENTS

Consumables constituted the largest share of the type segment

Global Infection Control Market is segmented by product Type into Equipment, Disinfectors, Sterilization Equipment, Services, Consumables. The dominant share taken by consumables is assumed to be the product of their continuous usage and short life cycle. Consumptive substances are commonly included in the disinfection, sterilization, and other control procedures and thus constitute a greater portion of the above procedures.

Hospitals held a commanding share of the end-user market

Global Infection Control Market is segmented by end-user into Hospitals, medical device companies, pharmaceuticals companies, research centers, and others. The large proportion is attributed primarily to the high risk of developing diseases in hospitals through the transmission of respiratory or blood-borne pathogens.

Reasons to Purchase this Report

Qualitative and quantitative analysis of the market based on segmentation involving both economic as well as non-economic factors

Provision of market value (USD Billion) data for each segment and sub-segment

Indicates the region and segment that is expected to witness the fastest growth as well as to

dominate the market

Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region

Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled

Extensive company profiles comprising of company overview, company insights, product benchmarking, and SWOT analysis for the major market players

The current as well as the future market outlook of the industry with respect to recent developments which involve growth opportunities and drivers as well as challenges and restraints of both emerging as well as developed regions

Includes in-depth analysis of the market of various perspectives through Porter's five forces analysis

Provides insight into the market through Value Chain

Market dynamics scenario, along with growth opportunities of the market in the years to come
