Mountain Bike Market Size, Share, and Analysis, By Product Type (E-Mountain Bikes, Standard Mountain Bikes), By Type (Cross Country Bikes, All Mountain Bikes, Downhill Bikes, Freeride Bikes, Dirt Jumping Bikes), By Application (Racing, Leisure) and Regional Forecasts, 2022-2032

PRODUCT OVERVIEW

Mountain Bike Market size was USD 8.32 billion in 2021 and projected to grow from USD 9.4 billion in 2023 to USD 16.1 billion by 2032, exhibiting a CAGR of 6.2% during the forecast period.

Mountain bikes or mountain bicycles are specially designed for off-road cycling activities. Mountain bikes share a few similarities with several bicycles, but integrate characteristics designed to improve performance and durability in uneven terrains, which makes them heavier, less efficient and more complex on smooth surfaces. Precisely, additional rear suspension on trails are more difficult. Mountain bikes having 27.5-inch wheels are more advantageous for the smaller riders.

MARKET HIGHLIGHTS

Mountain Bike Market is expected to reach USD 16.1 billion, growing at a CAGR of 6.2% during the forecast period owing to the increasing popularity of bicycle sports among triathletes globally and rising interest in outdoor activities. The market is also gaining from the surge in interest in cycling as a sustainable means of transportation in cities and the growing worries about on-road bike accidents. These factors are expected to boost the Mountain Bike Market over the forecast period.
