Non-Small Cell Lung Cancer (NSCLC) Market By histology (large cell carcinoma, adenocarcinoma and SCC or squamous cell carcinoma); By treatment (chemotherapy, radiation and surgery)and Region -Analysis of Market Size, Share & Trends for 2014 - 2019 and Forecasts to 2030

PRODUCT OVERVIEW

Small cell lung cancer (SCLC) and non-small cell lung cancer (NSCLC) are two main types of lung cancer NSCLC is the most common type of lung cancer accounting for approximately 85% of all lung cancers (IASLC, n.d.).Any epithelial lung cancer other than SCLC can be classified as NSCLC.NSCLC may be in the middle of the chest, but often also in other parts of the lung. Although NSCLCs are associated with smoking, they can also be found in patients who never have smoked. Adenocarcinomas are also common. Furthermore, chemotherapy and radiation therapy are fairly insensitive compared to SCLC.NSCLC comes from the central bronchial epithelial lung cells to the terminal alveoli. The histological type NSCLC coincides with the site of origin and reflects the variation in bronchial to alveoli respiratory epithelium. Whereas adenocarcinoma and bronchioloalveolar cancer typically originate from the peripheral lung tissue near central bronchuscommon symptoms include thoracic pain, wheezing, squatting, heartburn, chronic bronchitis, and loss of appetite, fatigue, shortness of

respiration, bone pain, trouble swallowing, and limb stubbornness.

MARKET HIGHLIGHTS

Non-Small Cell Lung Cancer (NSCLC) Market is expected to project a CAGR of 11.70% during the forecast period, 2021-2030

The Non-Small Cell Lung Cancer (NSCLC) market is anticipated to grow on the back of opportunities generated by the advent of the rising total number of lung cancer globally out of which Non-Small Cell Lung Cancer (NSCLC) holds a significant share. This has attracted the majority of the key leaders to focus on advancing therapeutics and increasing the efficiencies of the existing ones. This market is also driven by the existing status of lung cancer as the most widely occurring disease and the increase in the number of deaths it has caused. Also, an increase in the investments by the key leaders in research and developments and the introduction of Non-Small Cell Lung Cancer (NSCLC) therapeutics into the major market players is boosting the market globally.

Reasons to Purchase this Report

Qualitative and quantitative analysis of the market based on segmentation involving both economic as well as non-economic factors

Provision of market value (USD Billion) data for each segment and sub-segment

Indicates the region and segment that is expected to witness the fastest growth as well as to dominate the market

Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region

Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled

Extensive company profiles comprising of company overview, company insights, product benchmarking, and SWOT analysis for the major market players

The current as well as the future market outlook of the industry with respect to recent developments which involve growth opportunities and drivers as well as challenges and restraints of both emerging as well as developed regions

Includes in-depth analysis of the market of various perspectives through Porter's five forces analysis

Provides insight into the market through Value Chain

Market dynamics scenario, along with growth opportunities of the market in the years to come
