### PRODUCT OVERVIEW

Opioid Use Disorder (OUD) Market is anticipated to grow at a CAGR of 10% in the forecast period (2024-2034), with the market size valued at USD 3.3 billion in 2023 and projected to reach USD 9.5 billion by 2034.

Opioid Use Disorder (OUD) is a chronic medical illness that involves a problematic pattern of opioid usage and causes substantial pain or suffering. Those with opioid use disorder usually display an uncontrollable need to use opioids despite severe effects, such as health challenges and interpersonal issues. This disorder can emerge from various sources, such as the misuse of prescription opioids, along with illicit drug usage

or even medically supervised opioid treatment. In addition, opioid use disorder can involve serious symptoms such as extreme cravings, withdrawal symptoms after stopping, and an inability to control consumption. Furthermore, treatment for OUD involves an integrated approach, such as medication and therapy, to ensure long-term recovery. Therefore, timely intervention and extensive support are crucial for tackling this complicated and demanding illness.

## MARKET HIGHLIGHTS

Opioid Use Disorder (OUD) Market is anticipated to reach USD 9.5 billion, growing at a CAGR of 10% during the forecast period, due to increasing awareness and proactive governmental efforts to address the opioid crisis. The expansion of the opioid use disorder market is attributed to the rising prevalence of OUD and the development of modern therapies to meet the evolving needs of patients. In addition, major industry players are investing in the creation of new medications and therapies, such as long-acting formulations and non-opioid alternatives. Moreover, while specific regions may have different approaches for the prevention and treatment of opioid misuse, collaboration among stakeholders remains crucial for the industry. This collaborative effort ensures constant innovation in the opioid use disorder market, which ultimately contributes to the goal of reducing the impact of opioid addiction on public health.
