Abstracts

[176 + Pages Research Report]Organic Personal Care Ingredients Market to surpass USD 14.9 billion by 2031 from USD 8.97 billion in 2021 at a CAGR of 5.21% in the coming years, i.e., 2021-31.

Product Overview

Organic Personal Care Ingredients market uses topical creams and lotions made of ingredients offered by nature. Most of the recent literature reviews plant-derived ingredients, which may comprise herbs, roots, flowers, and essential oils, but natural substances in skincare products include animal-derived products such as beeswax, and minerals, and many others. These products may be combined with several carrier agents, preservatives, surfactants, humectants, and emulsifiers.

Market Highlights

Global Organic Personal Care Ingredients market is expected to project a notable CAGR of 5.21% in 2031.

Global Organic Personal Care Ingredients to surpass USD 14.9 billion by 2031 from USD 8.97 billion in 2021 at a CAGR of 5.21% in the coming years, i.e., 2021-31.

Growing demand for personal care, along with rising awareness regarding personal health and safety, is predictable to boost the product demand.

Global Aroma chemicals: Segments

An organic segment to grow with the highest CAGR during 2021-31

Based on Type, the global Organic Personal Care Ingredients Market is segmented into Organic Ingredients and Natural Ingredients. Among the type segments, the organic segment is predicted to hold the majority revenue share in the market and is expected to continue during the forecast years. This rise of the segment is due to the rise in customers towards the adoption of organic products with natural ingredients such as vegetables, fruits, and herbs.

Skincare segment to grow with the highest CAGR during 2021-31

Based on application, the global Organic Personal Care Ingredients Market fragmented into Skin Care, Oral Care, Hair Care, Cosmetics, and Others. The skin care segment is expected to measure the highest share during the forecast year. Skincare includes face cleansers, moisturizers, toner & mist, eye creams, multipurpose balms, scrubs & exfoliators, and many others. These active multifunctional ingredients can deliver more than one function in a specific personal care product. For example, blemish balm (BB) cream has been endorsed as a multifunctional product that can treat several skin problems such as dullness, aging, and tanning due to overexposure to the sun.

Market Dynamics

Drivers

Increasing Awareness

The rise in awareness is boosting the organic personal care ingredient market. Growth in concerns regarding safety, security, and health; and the adverse effects of using synthetic chemicals are projected to boost the organic personal care ingredients market.

New product innovations and rise in disposable income

The demand for Organic Personal Care Ingredients is expected to be fueled by new product innovation and the growing popularity of various types of fragrances and cosmetic items. In the recent decade, disposable income has increased dramatically. As a result, global spending on beauty and personal care goods, medications, and household care items has surged, propelling the Organic Personal Care Ingredients Market to new heights.

Restraint

High cost of raw material

The lack of universal directives relating to applications of organic personal care ingredients is predictable to restrain the market during forecast years. Every country has different directions pertaining to applications of organic personal care ingredients. Companies find it hard to deal with these country-wise regulations. This is discouraging the investment in the organic personal care ingredients market, thus restraining the market.

Global Aroma chemicals: Key Players

Cargill, Incorporated

Company Overview, Business Strategy, Key Product Offerings, Financial Performance, Key Performance Indicators, Risk Analysis, Recent Development, Regional Presence, SWOT Analysis

BASF SE

PRIDE SEEDS

SG Ceresco Inc.

Other Prominent Players

Global Aroma chemicals: Regions

Global Organic Personal Care Ingredients market is segmented based on regional analysis into five major regions: North America, Latin America, Europe, Asia Pacific, and the Middle East and Africa. The organic personal care ingredients market in the Asia Pacific is predicted to expand at a rapid pace during the forecast years. The countries such as Japan, China, and India have a high demand for organic personal care ingredients and have seen substantial growth in product demand during the past few years owing to growing disposable income and increasing awareness about the ill-effects of synthetic products.

Global Organic Personal Care Ingredients is further segmented by region into:

North America Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR –

Organic Personal Care Ingredients Market: Segmented by Type (Organic Ingredients, Natural Ingredients), By App...

United States and Canada

Latin America Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – Mexico, Argentina, Brazil and Rest of Latin America
