Pharmaceutical Contract Manufacturing Market size was USD 133.5 billion in 2021 and projected to grow from USD 155.0 billion in 2023 to USD 307.3 billion by 2032, exhibiting a CAGR of 7.9% during the forecast period.

Pharmaceutical Contract Manufacturing is the method by which pharmaceutical medications are made under the contract. In short, drug companies collaborate with a manufacturing business to create a necessary quantity of their service or product and expedite production. A contract development and manufacturing organization (CDMO) manages all operations starting from pre-formulation as well as formulation development to production and clinical trials, as opposed to a contract manufacturing organization (CMO), which makes pre-formulated drugs.

MARKET HIGHLIGHTS

Pharmaceutical Contract Manufacturing market is expected to reach USD 307.3 billion, growing at a CAGR of 7.9% during the forecast period owing to factors like increasing research activities as well as investments in generic medications. Moreover, the significant price of in-house drug development and the regulatory filing support offered by CDMOs are propelling the expansion of the market.
