## **Abstracts**

Power Over Ethernet Lighting Market Size, Share, and Analysis, By Offering (Hardware, Software, and Services), By Wattage (Up to 25 Watt and Above 25 Watt), By Application (Commercial, Residential, Industrial, and Others), and By Region (North America, Europe, Asia-Pacific, And Rest of the World) And Regional Forecast 2023-2032

### **PRODUCT OVERVIEW**

Power Over Ethernet Lighting Market is expected to grow at a CAGR of 31.8% in the forecast period (2023-2032), with the market size valued at USD 0.28 billion in 2021 and projected to reach USD 5.9 billion by 2032.

Power Over Ethernet lighting combines power and data transfer via Ethernet connections to provide energy-efficient and adaptive lighting solutions for commercial buildings, industrial locations, outdoor spaces, and residences. It offers centralized control, decreases installation complexity and costs, and connects easily with other smart building technologies, improving energy optimization and lighting management capabilities across several industries.

## MARKET HIGHLIGHTS

Power Over Ethernet Lighting Market is expected to reach USD 5.9 billion, growing at a CAGR of 31.8% owing to increase in global connection demand, and government initiatives and investments. Additionally, the power over ethernet (Poe) lighting market share is likely to expand throughout the forecast period due to an increase in demand for intelligent workspaces in developing areas such as LAMEA and Asia-Pacific. On the other hand, the high starting prices of PoE equipment, accessories, and services limit the growth of the power over ethernet (Poe) lighting market over the projection period.
