Product Overview

Purple foods have a high concentration of anthocyanins. Purple grapes, figs, passion fruit, raisins, plums, and dried plums are all common purple fruits. Purple foods include berries including blackberries, blueberries, elderberries, cranberries, chokeberries, and bilberries. The purple food aids in the prevention of diseases like cancer, ageing, obesity, and inflammation. Anthocyanins can protect the heart muscle and blood vessels from oxidative damage, delay the ageing of the brain by two and a half years, and promote eye health.

Market Highlights

Global Purple Foods market is expected to project a notable CAGR in 2030.

Global Purple Foods to surpass USD billion by 2030 from USD billion in 2020 at a CAGR in the coming years, i.e., 2021-30. This growth is anticipated due to increasing mergers and acquisitions across various sectors which will create a worldwide demand for Purple Foods. The growth of online stores is also propelling the selling of high-end products. Market shifts toward healthier foods, population growth, enhanced cold chain logistics, adoption of automation systems and goods, and other factors are driving the global purple food industry.
