PRODUCT OVERVIEW

Respiratory masks are procedure masks that are flat or pleated (some are like cups); they are affixed to the head with straps. Wearing a medical mask is one of the prevention measures to limit the spread of certain respiratory diseases.

MARKET HIGHLIGHTS

Respiratory masks Market is expected to project a CAGR of 12.70% during the forecast

period, 2019-2030

The respiratory masks market is estimated to grow on the back of the following reasons. The World Health Organization (WHO) has strongly advised using a face mask at home as well as in all health care institutions to tackle the health challenges and hazards posed by COVID-19 with success. The face mask is used to prevent respiratory infections and to build the physical barrier between the wearer's nose and mouth and possible pathogens and is available in various thicknesses and abilities to protect against pollutants. Increasing cases of coronavirus worldwide are expected to benefit the market in the upcoming years. Constantly increasing pollution and polluted working environment, rising consumer awareness regarding airborne infections, the high consumption rate of surgical masks for personal use, increasing demand for face masks from e-commerce platforms, and a rising standard of living, are some of the factors benefitting the market growth.
