Abstracts

Product Overview

Spice is a plant component, such as a seed, fruit, root, bark, or other parts, that is primarily used for flavoring, coloring, or preserving food. Antimicrobial properties are found in many spices. Seasonings and spices are important in all cuisines because they give each one its own distinct aroma and flavor. The demand for seasonings and spices is one of those that can withstand a downturn in the long run. Immigrants bring their native cuisines with them, resulting in the growing popularity of cross-cultural cuisines around the world. This trend has boosted the global spices market by increasing demand for various spices, especially in Europe and North America. The global seasonings and spices market will continue to be driven by increasing demand for exquisite spices and seasonings for in-home culinary preparations and rising popularity for exotic foods.

Market Highlights

Global Seasoning and Spices market is expected to project a notable CAGR of 4.9% in 2030.

Global Seasoning and Spices Market to surpass USD XXX million by 2030 from USD XXX million in 2020 at a CAGR of 4.9 % in the coming years, i.e., 2021-30. This growth is anticipated due to increasing mergers and acquisitions across various sectors which

will create a worldwide demand for Seasoning and Spices. The growth of online stores is also propelling the selling of high-end products. E-commerce allows the simple purchasing of goods manufactured in remote locations. This, in turn, has made a major contribution to the development of the global Seasoning and Spices industry.

Global Seasoning and Spices Market: Segments

Spices segment to grow with the highest CAGR during 2020-30

Global Seasoning and Spices Market is segmented by product type into Herbs, Salt, and Salt substitutes and Spices. Spices segment held the largest market share of in the year 2020. Over the forecast era, raising awareness of the health benefits and properties of various spices would help to boost demand. India was the world's largest manufacturer, buyer, and exporter of the commodity in 2020. Bangladesh, Turkey, China, Ethiopia, Sri Lanka, Jamaica, and Pakistan, for example, produce large quantities of spices.

Soups, Sauces, & Dressing's segment to grow with the highest CAGR during 2020-30

Global Seasoning and Spices Market is segmented by Application into Bakery & Confectionery Products, Meat & Poultry Products, Frozen Food, Soups, Sauces, & Dressings, Beverages and Others. Over the forecast period, the Soups, Sauces, & Dressings Application is projected to expand at the fastest pace. Salad consumption has increased as people become more health conscious, driving demand for different types of dressings and sauces in the seasoning and spices market. The demand has developed as a result of this. Furthermore, due to the belief that organic products are healthier than refined foods, organic product variants in this segment have seen considerable demand.

Seasoning and Spices Market Dynamics

Drivers

Increasing awareness about best fit and growing availability

Surging demand of Seasoning and Spices Market from numerous end user industries is the key factor contributing in the market growth. Consumers are becoming more aware of foods with high nutritional value, which are free of chemicals and preservatives, as well as microbiological protection. Owing to its high moisture content, richness in growth factors such as nitrogenous compounds, and source of minerals and vitamins, meat is an ideal medium for bacterial growth. In addition, the pH is favorable for microorganism development. Food preservatives inhibit microbial activity as well as chemical and physical reactions that cause meat and meat products to deteriorate and spoil. Meat preservation works by reducing the amount of substances in meat that cause microbes to multiply. Sodium benzoate, benzoic acid, and propionic acid are the most widely used

chemical preservatives. While these preservatives aid in the control of microbe growth in meat, they also degrade its nutritional value.

Environmental factors and other factors affect on seasoning and spices

Additionally, they have harmful health effects such as hyperactivity in infants, kidney and liver damage, ingestion, gastritis, and peptic ulcers. As a result of increased consumer awareness of the harmful effects of chemical preservatives, demand for natural preservation, such as spices for meat and poultry products, has increased. As a result, demand for spices and seasonings are expected to rise.

Restraint

Environmental factors and other factors affect on seasoning and spices

Spice production is extremely unpredictable around the world due to environmental factors such as rainfall, floods, and droughts, resulting in a demand-supply gap.

Petroleum prices, food stock levels, and currency exchange rates all have an effect on commodity prices. As a result, the market's growth is likely to be hampered.
