Abstracts

[189+ Pages Research Report] Global Starch based Plastics Market to surpass USD 742 Million by 2030 from USD 504 Million in 2020 at a CAGR of 4.1% in the coming years, i.e., 2021-30.

Product Overview

Poly(lactic acid), poly(butylene adipate terephthalate), poly(butylene succinate), poly(caprolactone), and poly(hydroxyalkanoates) are among the biodegradable or compostable plastics used in starch-based plastics. They have a variety of characteristics, including high water resistance, processing, and mechanical properties. They can also accommodate a variety of physical qualities including tensile strength and heat tolerance. As a result, it is frequently employed as a substitute for traditional plastics. Automotive and transportation, agricultural, packaging, and consumer goods are just a few of the end-user applications for starch-based polymers.

Market Highlights

Global Starch based Plastics market is expected to project a notable CAGR of 4.1% in 2030.

The rising need for starch-based polymers in food packaging is a major factor driving the global industry forward. Because of their numerous qualities, such as longer shelf life, reduced food loss, and improved organoleptic aspects of food, starch-based polymers find use in food packaging and edible films. Environmental rules that apply to traditional plastic materials are also fueling the global market's expansion. However, the market's growth is hampered by the restricted production capacity and hydrophilic nature of starch-based polymers.

Global Starch based Plastics: Segments

Starch Blended with PLA to grow with the highest CAGR during 2020-30

Global Starch based Plastics market is segmented by type into Starch Blended with PLA, Starch Blended with PHA and Others. Starch Blended with PLA segment held the largest market share in the year 2020. The increased use of starch combined with PLA based bioplastic sheets in automotive, electronics, and agriculture applications is attributable to this rise. Package integrity, non-reactive with content, impermeable, versatile, and having high tensile strength are some of the advantages of using starch combined with PLA based bioplastic sheets. They are also 100 percent biodegradable and compostable. Because of its biocompatibility, low toxicity, oxygen barrier, water vapour barrier, degrading qualities, and mechanical capabilities, starch-based Bioplastics are widely used in a variety of industries.

Packaging segment to grow with the highest CAGR during 2020-30

Global Starch based Plastics market is divided by application into Agriculture and Horticulture, Automotive and Transportation, Packaging, Food and Beverage, Building and Construction, Electrical & Electronics, Textile and Others. Over the forecast period, the Packaging segment is projected to expand at the fastest pace. Massive amounts of packaging wind up in landfills, as well as unsustainable packaging products, are a major environmental concern. The packaging sector is increasing its need for bioplastic goods in order to address an environmental issue. Moreover, during the forecast period, the packaging industry's increased need for starch-based bioplastic flexible films would push the growth of this category. The flexible films have improved print and adhesive properties, allowing for high-speed lamination and good print quality.

Market Dynamics

Drivers

High demand for Starch based Plastics and increasing disposable income

The high demand for starch-based bioplastics is due to their water permeability and heat preservation properties, which make them ideal for use in agriculture because they reduce soil contamination and improve sustainability, which in turn increases the use of renewable raw materials derived from agro-industrial waste. Market expansion is aided by rising disposable income, rapid worldwide economic growth, and increased use in medical applications such as controlled medication release, space filled implants, and wound treatments.

Technological improvements and environment concerns

Due to technology improvements, the medical industry is predicted to increase rapidly, meeting market need. Mulch films are biopolymer films that are utilised in agriculture and horticulture. They keep humus in place and deliver the right amount of carbon to the soil. Concerns about the environment and low labour costs are projected to drive market expansion.

Restraint

Removing and disposing of plastic remnants and restricted production capacity

The main issue with using non-biodegradable plastic films is that they pollute soil when buried in landfills; also, removing and disposing of these plastic remnants from the field before or after harvest is an expensive and time-consuming process. The market's growth is hampered by the restricted production capacity and hydrophilic nature of starch-based polymers.

Global Starch based Plastics: Key Players

Kuraray Co. Ltd.

Rodenburg Biopolymers

Biome Bioplastics Limited

Wittenburg Group

Nihon Cornstarch Corporation

Toray Industries, Inc.

Cardia Bioplastics

Multibax Public Co.

FuturaMat

Other Prominent Players

Global Starch based Plastics: Regions

Global Starch based Plastics market is segmented based on regional analysis into five major regions. These include North America, Latin America, Europe, Asia Pacific and the Middle East and Africa. The expansion of this market in the APAC region is fueled by the increasing economies of Southeast Asian countries, rising disposable income, and rising population. Moreover, the rising demand for eco-friendly alternatives to traditional plastics from emerging economies such as China and India would propel the starch-based Bioplastic film market forward during the research period. Packaging is the most common application for bioplastic films in China and India, owing to the increased use of bottles, loose-fill, cups, pots, and blowers in both the domestic and commercial sectors.

Global Starch based Plastics is further segmented by region into:

North America Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – United States and Canada

Latin America Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – Mexico, Argentina, Brazil and Rest of Latin America

Europe Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – United Kingdom, France, Germany, Italy, Spain, Belgium, Hungary, Luxembourg, Netherlands, Poland, NORDIC, Russia, Turkey and Rest of Europe

Asia Pacific Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – India, China, South Korea, Japan, Malaysia, Indonesia, New Zealand, Australia and Rest of APAC

Middle East and Africa Market Size, Share, Trends, Opportunities, Y-o-Y Growth, CAGR – North Africa, Israel, GCC, South Africa and Rest of MENA

Contents

1. EXECUTIVE SUMMARY

2. GLOBAL STARCH BASED PLASTICS MARKET

- 2.1. Product Overview
- 2.2. Market Definition
- 2.3. Segmentation
- 2.4. Assumptions and Acronyms

3. RESEARCH METHODOLOGY

- 3.1. Research Objectives
- 3.2. Primary Research
- 3.3. Secondary Research
- 3.4. Forecast Model
- 3.5. Market Size Estimation

4. AVERAGE PRICING ANALYSIS

5. MACRO-ECONOMIC INDICATORS

6. MARKET DYNAMICS

- 6.1. Growth Drivers
- 6.2. Restraints
- 6.3. Opportunity
- 6.4. Trends

7. CORRELATION & REGRESSION ANALYSIS

- 7.1. Correlation Matrix
- 7.2. Regression Matrix

8. RECENT DEVELOPMENT, POLICIES & REGULATORY LANDSCAPE

9. RISK ANALYSIS

9.1. Demand Risk Analysis

9.2. Supply Risk Analysis

10. GLOBAL STARCH BASED PLASTICS MARKET ANALYSIS

10.1. Porters Five Forces

10.1.1. Threat of New Entrants

10.1.2. Bargaining Power of Suppliers

10.1.3. Threat of Substitutes

10.1.4. Rivalry

10.2. PEST Analysis

10.2.1. Political

10.2.2. Economic

10.2.3. Social

10.2.4. Technological

11. GLOBAL STARCH BASED PLASTICS MARKET

11.1. Market Size & forecast, 2020A-2030F

11.1.1. By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

11.1.2. By Volume (Million Units) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12. GLOBAL STARCH BASED PLASTICS MARKET: MARKET SEGMENTATION

12.1. By Regions

12.1.1. North America:(U.S. and Canada), By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.1.2. Latin America: (Brazil, Mexico, Argentina, Rest of Latin America), By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.1.3. Europe: (Germany, UK, France, Italy, Spain, BENELUX, NORDIC, Hungary, Poland, Turkey, Russia, Rest of Europe), By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.1.4. Asia-Pacific: (China, India, Japan, South Korea, Indonesia, Malaysia, Australia, New Zealand, Rest of Asia Pacific), By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.1.5. Middle East and Africa: (Israel, GCC, North Africa, South Africa, Rest of Middle East and Africa), By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.2. By Type: Market Share (2020-2030F)

12.2.1. Starch Blended with PLA, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.2.2. Starch Blended with PHA, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.2.3. Others, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3. By Application : Market Share (2020-2030F)

12.3.1. Cleaning products, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.2. Agriculture and Horticulture, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.3. Automotive and Transportation, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.4. Packaging, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.5. Food and Beverage, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.6. Building and Construction, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.7. Electrical & Electronics, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.8. Textile, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F

12.3.9. Others, By Value (USD Million) 2020-2030F; Y-o-Y Growth (%) 2021-2030F
