

Acute Lymphoblastic Leukemia - Pipeline Review, 2019

<https://marketpublishers.com/r/A5A41D97744AEN.html>

Date: November 2019

Pages: 165

Price: US\$ 1,250.00 (Single User License)

ID: A5A41D97744AEN

Abstracts

Firstview Insight's Acute Lymphoblastic Leukemia - Pipeline Review, 2019 provides an overview of the pipeline landscape of Acute Lymphoblastic Leukemia. It provides comprehensive insights of all the clinical and non-clinical therapeutics in development with detailed description about the collaborations; deals; designations; patent information etc. These reports encourage the clients in distinguishing the upcoming and existing competitors in their separate therapeutic spaces. The report provides detailed description of the competitor profiles with key milestones and evidence along with analysis by mechanism of action; route of administration; molecule type; stage of development. Information obtained from multiple sources will be used to triangulate and update the profiles. The report also provides key events in the last year related to the indication. This report provides detailed analysis of all the products along with the companies involved.

Acute lymphoblastic leukemia (ALL) is the most common cancer diagnosed in children. The cancer comes from a cell in the blood called a lymphocyte. Normal lymphocytes are produced in the bone marrow (along with other blood cells) and help fight infections. In ALL, the cancerous lymphocytes are called lymphoblasts. They do not help fight infection and crowd out the normal blood cells in the bone marrow so that the body cannot make enough normal blood cells. ALL is always fatal if it is not treated. With current treatments, most children and adolescents with this disease will be cured. The standard treatment for ALL involves about 2 years of chemotherapy. The drugs that are used, and the doses of the drugs, are similar but not identical for all children and adolescents with ALL.

List of drugs:

DASATINIB

DEXAMETHASONE

Dexrazoxane

Doxorubicin

ETOPOSIDE

HYDROCORTISONE

LEUCOVORIN CALCIUM

MERCAPTOPURINE

METHOTREXATE

NELARABINE

Vincristine

veltuzumab

epratuzumab

blinatumomab

inotuzumab ozogamicin (INO)

retuximab

moxetumomab pasudotox

ofatumumab

obinutuzumab

denintuzumab (SGB-CD19A)

dasatanib

ruxolitinib

ponatanib

selumetinib

bortezomib

carfilzomib

Report covers >40 drug details.

Drug Profile Overview:

The pipeline section provides descriptive drug profiles for the pipeline products including product description, mechanism of action, route of administration, molecule type, technology involved, chemical information.

Clinical Trial Overview:

This section of the report focuses on the clinical activity of the molecule. It includes both clinical and pre-clinical activity which provides detailed information about the safety, efficacy, tolerability, toxicity of pipeline drugs. A graphical representation of the clinical trial landscape of pipeline therapy which includes information about phase of development, trial design, treatment arms, dosage and frequency, formulation of the drug, primary and secondary completion date, enrolment number, exclusion and inclusion criteria, line of therapy. This section also includes the clinical trial results and analysis based on those results.

Product Development Activity:

This section of the report focuses on detail information about designations, exclusivity details, technology, licensing and collaboration, funding and financing, key milestones and various other development activities.

Company Overview:

Company profile includes the detail about type of company, headquarter, global presence, research focus and key financial

Scope

The report provides a competitive landscape

The report also provides clinical trial landscape of the pipeline drugs including status; trial phase; sponsor type and end-point status

The report provides the list of companies which are the most active in the pipeline

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery

The report provides descriptive drug profiles which includes product description; comprising detailed mechanism of action (MoA); route of administration (RoA); Stage of development; clinical trial status; licensing and collaboration details & other developmental activities

The report features comparative analysis of product profiles based on molecule type; mechanism of action (MoA); route of administration (RoA)

The report summarizes all the dormant and discontinued pipeline projects

The report also provides latest news for the past one year

Reasons To Buy

To identifying prominent players in the treatment landscape

To determine the drivers; barriers and unmet need in the treatment space

Gain strategically significant competitor information; analysis; and insights to formulate effective R&D strategies

Define in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

To understand the composition of the pipeline in terms of molecule type; molecular target; mechanism of action and route of administration

Contents

1. DISEASE OVERVIEW

- 1.1. Pathophysiology
- 1.2. Symptoms
- 1.3. Etiology
- 1.4. Diagnosis
- 1.5. Etiology
- 1.6. Treatment Algorithm
- 1.7. Treatment Options

2. FEATURED NEWS AND PRESS RELEASES, 2018-2019

3. LIST OF COMPANIES DEVELOPING ACUTE LYMPHOBLASTIC LEUKEMIA

4. TREATMENT ALGORITHM

5. CURRENT UNMET NEEDS

6. MARKET TRENDS

7. PIPELINE THERAPEUTICS

8. THERAPEUTICS UNDER DEVELOPMENT BY COMPANIES

9. LATE STAGE PRODUCTS (PHASE III)

- 9.1 Pegcrisantaspase
 - 9.1.1. Product Description
 - 9.1.2. Research and Development
 - 9.1.3. Product Development Activities
- 9.2. Pegaspargase
 - 9.2.1. Product Description
 - 9.2.2. Research and Development
 - 9.2.3. Product Development Activities

10. MID STAGE PRODUCTS (PHASE II)

10.1 BinD 19

10.1.1. Product Description

10.1.2. Research and Development

10.1.3. Product Development Activities

10.2. Dasatinib

10.2.1. Product Description

10.2.2. Research and Development

10.2.3. Product Development Activities

11. EARLY STAGE AND PRECLINICAL PRODUCTS (PHASE II)

11.1 Z36

11.1.1. Product Description

11.1.2. Research and Development

11.1.3. Product Development Activities

12. DRIVERS OF ACUTE LYMPHOBLASTIC LEUKEMIA

13. CONSTRAINTS OF ACUTE LYMPHOBLASTIC LEUKEMIA

14. THERAPEUTIC ASSESSMENT

14.1. Assessment by Route of Administration

14.2. Assessment by Phase & Route of Administration

14.3. Assessment by Molecule Type

14.4. Assessment by Phase & Molecule type

14.5. Assessment by Target

14.6. Assessment by Mechanism of Action

15. COLLABORATIONS AND ACQUISITIONS DETAILS

16. DORMANT PRODUCTS

17. DISCONTINUED PRODUCTS

18. MARKET TRENDS

19. MARKET OPPORTUNITY ASSESSMENT

20. UNMET NEEDS

21. SWOT ANALYSIS

22. APPENDIX

23. REPORT METHODOLOGY

24. CONSULTING SERVICES

25. DISCLAIMER
