Abstracts

Firstview Insight's H1N1 - Pipeline Review-2019 provides an overview of the pipeline landscape of H1N1. It provides comprehensive insights of all the clinical and non-clinical therapeutics in development with detailed description about the collaborations; deals; designations; patent information etc. These reports encourage the clients in distinguishing the upcoming and existing competitors in their separate therapeutic spaces. The report provides detailed description of the competitor profiles with key milestones and evidence along with analysis by mechanism of action; route of administration; molecule type; stage of development. Information obtained from multiple sources will be used to triangulate and update the profiles. The report also provides key events in the last year related to the indication. This report provides detailed analysis of all the products along with the companies involved.

Influenza A virus subtype H1N1 is the subtype of influenza A virus that was the most common cause of human influenza (flu) in 2009, and is associated with the 1918 outbreak known as the Spanish flu. It is an orthomyxovirus that contains the glycoproteins haemagglutinin and neuraminidase. For this reason, they are described as H1N1, H1N2 etc. depending on the type of H or N antigens they express with metabolic synergy. Haemagglutinin causes red blood cells to clump together and binds the virus to the infected cell. Neuraminidase is a type of glycoside hydrolase enzyme which helps to move the virus particles through the infected cell and assist in budding from the host cells.

Some strains of H1N1 are endemic in humans and cause a small fraction of all influenza-like illness and a small fraction of all seasonal influenza. H1N1 strains caused a small percentage of all human flu infections in 2004–2005. Other strains of H1N1 are endemic in pigs (swine influenza) and in birds (avian influenza).

In June 2009, the World Health Organization (WHO) declared the new strain of swine-

origin H1N1 as a pandemic. This strain is often called swine flu by the public media. This novel virus spread worldwide and had caused about 17,000 deaths by the start of 2010. On August 10, 2010, the World Health Organization declared the H1N1 influenza pandemic over, saying worldwide flu activity had returned to typical seasonal patterns.

Drug Profile Overview:

The pipeline section provides descriptive drug profiles for the pipeline products including product description, mechanism of action, route of administration, molecule type, technology involved, chemical information.

Clinical Trial Overview:

This section of the report focuses on the clinical activity of the molecule. It includes both clinical and pre-clinical activity which provides detailed information about the safety, efficacy, tolerability, toxicity of pipeline drugs. A graphical representation of the clinical trial landscape of pipeline therapy which includes information about phase of development, trial design, treatment arms, dosage and frequency, formulation of the drug, primary and secondary completion date, enrolment number, exclusion and inclusion criteria, line of therapy. This section also includes the clinical trial results and analysis based on those results.

Product Development Activity:

This section of the report focuses on detail information about designations, exclusivity details, technology, licensing and collaboration, funding and financing, key milestones and various other development activities.

Company Overview:

Company profile includes the detail about type of company, headquarter, global presence, research focus and key financial

Scope

The report provides a competitive landscape

The report also provides clinical trial landscape of the pipeline drugs including

status; trial phase; sponsor type and end-point status

The report provides the list of companies which are the most active in the pipeline

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery

The report provides descriptive drug profiles which includes product description; comprising detailed mechanism of action (MoA); route of administration (RoA); Stage of development; clinical trial status; licensing and collaboration details & other developmental activities

The report features comparative analysis of product profiles based on molecule type; mechanism of action (MoA); route of administration (RoA)

The report summarizes all the dormant and discontinued pipeline projects

The report also provides latest news for the past one year

Reasons To Buy

To identifying prominent players in the treatment landscape

To determine the drivers; barriers and unmet need in the treatment space

Gain strategically significant competitor information; analysis; and insights to formulate effective R&D strategies

Define in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

To understand the composition of the pipeline in terms of molecule type; molecular target; mechanism of action and route of administration

Contents

1. DISEASE OVERVIEW

- 1.1. Pathophysiology
- 1.2. Symptoms
- 1.3. Etiology
- 1.4. Diagnosis
- 1.5. Etiology
- 1.6. Treatment Algorithm
- 1.7. Treatment Options

2. FEATURED NEWS AND PRESS RELEASES, 2018-2090

3. LIST OF COMPANIES DEVELOPING PRODUCTS FOR H1N1

4. TREATMENT ALGORITHM

5. CURRENT UNMET NEEDS

6. MARKET TRENDS

7. PIPELINE THERAPEUTICS

8. THERAPEUTICS UNDER DEVELOPMENT BY COMPANIES

9. LATE STAGE PRODUCTS (PHASE III)

9.1 Drug 1

- 9.1.1. Product Description
- 9.1.2. Research and Development
- 9.1.3. Product Development Activities

9.2. Drug 2

- 9.2.1. Product Description
- 9.2.2. Research and Development
- 9.2.3. Product Development Activities

10. MID STAGE PRODUCTS (PHASE II)

10.1 Drug 1

- 10.1.1. Product Description
- 10.1.2. Research and Development
- 10.1.3. Product Development Activities

10.2. Drug 2

- 10.2.1. Product Description
- 10.2.2. Research and Development
- 10.2.3. Product Development Activities

11. EARLY STAGE AND PRECLINICAL PRODUCTS (PHASE II)

11.1 Drug 1

- 11.1.1. Product Description
- 11.1.2. Research and Development
- 11.1.3. Product Development Activities

11.2. Drug 2

- 11.2.1. Product Description
- 11.2.2. Research and Development
- 11.2.3. Product Development Activities

12. DRIVERS OF H1N1

13. CONSTRAINTS OF H1N1

14. THERAPEUTIC ASSESSMENT

- 14.1. Assessment by Route of Administration
- 14.2. Assessment by Phase & Route of Administration
- 14.3. Assessment by Molecule Type
- 14.4. Assessment by Phase & Molecule type
- 14.5. Assessment by Target
- 14.6. Assessment by Mechanism of Action

15. COLLABORATIONS AND ACQUISITIONS DETAILS

16. DORMANT PRODUCTS

17. DISCONTINUED PRODUCTS

18. MARKET TRENDS

19. MARKET OPPORTUNITY ASSESSMENT

20. UNMET NEEDS

21. SWOT ANALYSIS

22. APPENDIX

23. REPORT METHODOLOGY

24. CONSULTING SERVICES

25. DISCLAIMER
