Abstracts

Firstview Insight's Medullary Thyroid Cancer - Pipeline Review, 2019 provides an overview of the pipeline landscape of Medullary Thyroid Cancer. It provides comprehensive insights of all the clinical and non-clinical therapeutics in development with detailed description about the collaborations; deals; designations; patent information etc. These reports encourage the clients in distinguishing the upcoming and existing competitors in their separate therapeutic spaces. The report provides detailed description of the competitor profiles with key milestones and evidence along with analysis by mechanism of action; route of administration; molecule type; stage of development. Information obtained from multiple sources will be used to triangulate and update the profiles. The report also provides key events in the last year related to the indication. This report provides detailed analysis of all the products along with the companies involved.

Thyroid cancer is a type of cancer that starts in the thyroid gland. Cancer starts when cells begin to grow out of control. It is common for people with thyroid cancer to have few or no symptoms. Thyroid cancers are often diagnosed by routine examination of the neck during a general physical exam. They are also unintentionally found by x-rays or other imaging scans that were performed for other reasons. The treatments available for thyroid cancer are the surgical removal of the thyroid gland, radioactive ablation, and thyroid stimulating hormone (TSH) suppression therapy.

The growing prevalence of Thyroid cancer across the globe, increased demand for therapeutic products for the treatment of this medical condition, increase in government initiatives and promising pipeline are key drivers for the global Thyroid cancer market. As the drugs for Thyroid cancer are expensive there is great scope for present and upcoming players in this market. However low success rate in the clinical trial remains to be the major detriment.

While the majority of differentiated thyroid cancers are treatable, RAI-refractory locally advanced or metastatic disease is more difficult to treat and is associated with a lower patient survival rate. In metastatic thyroid cancer, 20–25 percent of cases are RAI-refractory. The report covers ~30 drug in the pipeline. Almost 55% of the drug candidates are in mid stage of development.

LIST OF PRODUCTS:

Lenvima

Sorafenib

Zactima

Donafenib

Trametinib

Dabrafenib

GI-6207

Ofranergene obadenovec

Sapanisertib

Vemurafenib

Pralsetinib

Crolibulin

Selpercatinib

Debio 1124

Drug Profile Overview:

The pipeline section provides descriptive drug profiles for the pipeline products including product description, mechanism of action, route of administration, molecule type, technology involved, chemical information.

Clinical Trial Overview:

This section of the report focuses on the clinical activity of the molecule. It includes both clinical and pre-clinical activity which provides detailed information about the safety, efficacy, tolerability, toxicity of pipeline drugs. A graphical representation of the clinical trial landscape of pipeline therapy which includes information about phase of development, trial design, treatment arms, dosage and frequency, formulation of the drug, primary and secondary completion date, enrolment number, exclusion and inclusion criteria, line of therapy. This section also includes the clinical trial results and analysis based on those results.

Product Development Activity:

This section of the report focuses on detail information about designations, exclusivity details, technology, licensing and collaboration, funding and financing, key milestones and various other development activities.

Company Overview:

Company profile includes the detail about type of company, headquarter, global presence, research focus and key financial

Scope

The report provides a competitive landscape

The report also provides clinical trial landscape of the pipeline drugs including status; trial phase; sponsor type and end-point status

The report provides the list of companies which are the most active in the pipeline

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery

The report provides descriptive drug profiles which includes product description; comprising detailed mechanism of action (MoA); route of administration (RoA); Stage of development; clinical trial status; licensing and collaboration details & other developmental activities

The report features comparative analysis of product profiles based on molecule type; mechanism of action (MoA); route of administration (RoA)

The report summarizes all the dormant and discontinued pipeline projects

The report also provides latest news for the past one year

Reasons To Buy

To identifying prominent players in the treatment landscape

To determine the drivers; barriers and unmet need in the treatment space

Gain strategically significant competitor information; analysis; and insights to formulate effective R&D strategies

Define in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

To understand the composition of the pipeline in terms of molecule type; molecular target; mechanism of action and route of administration

Contents

1. DISEASE OVERVIEW

- 1.1. Pathophysiology
- 1.2. Symptoms
- 1.3. Etiology
- 1.4. Diagnosis
- 1.5. Etiology
- 1.6. Treatment Algorithm
- 1.7. Treatment Options

2. FEATURED NEWS AND PRESS RELEASES, 2018-2019

3. LIST OF COMPANIES DEVELOPING MEDULLARY THYROID CANCER

4. TREATMENT ALGORITHM

5. CURRENT UNMET NEEDS

6. MARKET TRENDS

7. PIPELINE THERAPEUTICS

8. THERAPEUTICS UNDER DEVELOPMENT BY COMPANIES **9. LATE STAGE PRODUCTS (PHASE III)**

9.1 Donafenib

- 9.1.1. Product Description
- 9.1.2. Research and Development
- 9.1.3. Product Development Activities

9.2. Trametinib

- 9.2.1. Product Description
 - 9.2.2. Research and Development
 - 9.2.3. Product Development Activities
- #### 10. Mid Stage Products (Phase II)

10.1 GI-6207

- 10.1.1. Product Description
- 10.1.2. Research and Development
- 10.1.3. Product Development Activities

10.2. Ofranergene obadenovec

10.2.1. Product Description

10.2.2. Research and Development

10.2.3. Product Development Activities

11. EARLY STAGE AND PRECLINICAL PRODUCTS (PHASE II)

11.1 Pralsetinib

11.1.1. Product Description

11.1.2. Research and Development

11.1.3. Product Development Activities

11.2. XXX

11.2.1. Product Description

11.2.2. Research and Development

11.2.3. Product Development Activities

12. DRIVERS OF MEDULLARY THYROID CANCER

13. CONSTRAINTS OF MEDULLARY THYROID CANCER

14. THERAPEUTIC ASSESSMENT

14.1. Assessment by Route of Administration

14.2. Assessment by Phase & Route of Administration

14.3. Assessment by Molecule Type

14.4. Assessment by Phase & Molecule type

14.5. Assessment by Target

14.6. Assessment by Mechanism of Action

15. COLLABORATIONS AND ACQUISITIONS DETAILS

16. DORMANT PRODUCTS

17. DISCONTINUED PRODUCTS

18. MARKET TRENDS

19. MARKET OPPORTUNITY ASSESSMENT

20. UNMET NEEDS

21. SWOT ANALYSIS

22. APPENDIX

23. REPORT METHODOLOGY

24. CONSULTING SERVICES

25. DISCLAIMER
