Medical Meeting Outcomes and Insights

Barcelona, September 2009 – The results of three drug trials announced at the prestigious European Society of Cardiology Congress 2009 are expected to have a major impact on cardiovascular clinical practice.

According to FirstWord's report, Conference Intelligence Dossier: ESC 2009 Congress, Barcelona, critical announcements included AstraZeneca's PLATO study showing Brilinta's efficacy, and Boehringer Ingelheim's RE-LY investigation proving the benefits of Pradaxa over Warfarin. Delegates also heard that Sanofi-aventis hopes to sustain its market share after the Current OASIS-7 study found that doubling the Plavix dose reduced stent thrombosis and major cardiovascular events.

But that's not all. The congress, held August 28 to September 2, witnessed 9,848 abstracts, 80 industry satellite symposia and workshops, clinical trial hotlines and presentations attended by more than 30,000 international delegates, as well as the latest updates from the ISAR-TEST-4, AAA and SYNTAX studies.
