Abstracts

Gain new key opinion leader (KOL) insights on the latest events happening in melanoma. Topics covered include expert opinions on; results of the Phase III EORTC1325/KEYNOTE-054 trial investigating pembrolizumab (Keytruda; Merck & Co.) as monotherapy for patients with surgically resected high-risk melanoma; views on the potential of Idera Pharmaceuticals' IMO-2125, which has been granted Fast Track designation by the FDA in combination with ipilimumab for the treatment of patients with anti-PD-1 refractory metastatic melanoma; and views on the results of a Phase II study investigating Iovance Biotherapeutics' LN-144 for the treatment of metastatic melanoma.
