Abstracts

Charting the Future Multiple Sclerosis Market Landscape

Over the next five years, the global multiple sclerosis (MS) market is set to grow from \$12.3 billion in 2011 to \$17.3 billion in 2016. Primary drivers of this growth will be the entry of new pipeline therapies, satisfying the unmet needs of convenient administration and more efficacious therapy, and continued uptake of existing therapies.

Therapy Trends Consensus Outlook: Multiple Sclerosis analyses the global MS market players and products of today and tomorrow. Start mapping your market parameters with access to the following comprehensive resources:

An in-depth 5-year forecast report based on analyst consensus, mapping the impact of future events to predicted product performance

A detailed forecast data analysis spreadsheet model comparing critical market parameters including

Timely event-driven market forecast report and data analysis updates over the next 12 months

Mapping Future Events to Product Sales Forecasts

The forecast analysis report component of Consensus Outlook: Multiple Sclerosis delivers a rich analysis of product-level sales forecast data and of the future events that underpin the forecasts. The product of meticulous FirstWord research, its historical

sales data (2006–11) is based on company information, and the five-year (2012-16) product level sales forecasts are consensus projections derived from a comprehensive selection of continually assessed equity research reports.

The report combines independent, unbiased, accurate forecasts with invaluable insights into factors that impact future product performance, backed-up by research of analysts who have an unrivalled level of intimacy with the market, the players, their products and their strategies.

REPORT FEATURES:

Historical MS sales from 2006–2011

Forecast MS sales from 2012-2016

Key competitors and drug developers
