Abstracts

The Global Market for Energetic Materials 2024-2035 provides an in-depth analysis of the evolving energetic materials industry. Energetic materials, classified as high energy material, explosives, propellants, and pyrotechnic, are compounds capable of rapidly releasing large amounts of energy through controlled chemical reactions.

This comprehensive report covers the key types of energetic materials including RDX, HMX, CL-20, TNT, PETN, NTO, TATB, FOX-7, ADN, ANPz, HNIW, and ONC. EMs find a wide range of applications both in civil and military sectors. The report examines their classification, manufacturing precursors, and details each major type – describing advantages, disadvantages, production methods, applications and demand factors. A thorough markets and applications analysis is provided, covering military/defense (warheads, ammunition, boosters, detonators, torpedoes, demolition), aerospace (rocket propulsion, gas generators, explosive bolts, airbags), mining, construction/demolition, oil/gas (perforating, well stimulation, exploration), and pyrotechnics (fireworks, flares, tracers). Regulations across the US, Europe, China, Japan, South Korea, Australia, India and Singapore are examined to provide compliance insights. Pricing analysis reveals current market prices for common energetic materials. Supply chain breakdowns detail energetic materials sourcing, manufacturing, exporting and domestic distribution.

Technological advancements are explored including nanomaterials, green energetics, advanced formulations, AI/modeling, additive manufacturing, safety/sensitivity studies, bioengineering approaches, green/insensitive materials, and propulsion system innovations. Customer segmentation analyzes energetic materials usage across military, aerospace, mining, construction, oil/gas, and pyrotechnic sectors.

Comprehensive geographic market intelligence covers the US, China, India, Asia-Pacific, Russia, Middle East, Europe and Latin America.

Forecasts are provided for the total addressable market size by application through 2035. Historical data from 2020 quantifies the overall market size (metric tons and \$ millions) for key energetic material types like RDX, HMX, CL-20, PETN and others. Projections to 2035 are broken down by type, revenue source and world region.

Risks, opportunities and future outlook considerations round out this definitive energetic materials market report. The competitive landscape is mapped with profiles of leading companies. Companies profiled include BAE Systems, Chemring Nobel, Hanwha Corporation, Island Pyrochemical Industries (IPI), LIG Nex1, Nammo AS, Nitro-Chem SA, Northrop Grumman, Poongsan Corporation, Rheinmetall Defence, Saudi Chemical and main Russian, Chinese and India producers.

Contents

1 EXECUTIVE SUMMARY

- 1.1 Overview of the global energetic materials market
- 1.2 Key market trends
- 1.3 Growth drivers
- 1.4 Market Challenges
- 1.5 Biobased energetic materials

2 INTRODUCTION

- 2.1 Definition and classification of energetic materials
- 2.2 Precursors
- 2.3 Types of energetic materials
 - 2.3.1 RDX (Research Department Explosive)
 - 2.3.1.1 Description and Manufacture
 - 2.3.1.2 Advantages
 - 2.3.1.3 Disadvantages
 - 2.3.1.4 Applications and Market Demand
 - 2.3.2 HMX (High Melting Explosive)
 - 2.3.2.1 Description and Manufacture
 - 2.3.2.2 Advantages
 - 2.3.2.3 Disadvantages
 - 2.3.2.4 Applications and Market Demand
 - 2.3.3 CL-20 (Hexanitrohexaazaisowurtzitane)
 - 2.3.3.1 Description and Manufacture
 - 2.3.3.2 Advantages
 - 2.3.3.3 Disadvantages
 - 2.3.3.4 Applications and Market Demand
 - 2.3.4 TNT (Trinitrotoluene)
 - 2.3.4.1 Description and Manufacture
 - 2.3.4.2 Advantages
 - 2.3.4.3 Disadvantages
 - 2.3.4.4 Applications and Market Demand
 - 2.3.5 PETN (Pentaerythritol tetranitrate)
 - 2.3.5.1 Description and Manufacture
 - 2.3.5.2 Advantages
 - 2.3.5.3 Disadvantages

- 2.3.5.4 Applications and Market Demand
- 2.3.6 NTO (3-Nitro-1,2,4-triazol-5-one)
 - 2.3.6.1 Description and Manufacture
 - 2.3.6.2 Advantages
 - 2.3.6.3 Disadvantages
 - 2.3.6.4 Applications and Market Demand
- 2.3.7 TATB (Triaminotrinitrobenzene)
 - 2.3.7.1 Description and Manufacture
 - 2.3.7.2 Advantages
 - 2.3.7.3 Disadvantages
 - 2.3.7.4 Applications and Market Demand
- 2.3.8 FOX-7 (1,1-Diamino-2,2-dinitroethene)
 - 2.3.8.1 Description and Manufacture
 - 2.3.8.2 Advantages
 - 2.3.8.3 Disadvantages
 - 2.3.8.4 Applications and Market Demand
- 2.3.9 ADN (Ammonium dinitramide)
 - 2.3.9.1 Description and Manufacture
 - 2.3.9.2 Advantages
 - 2.3.9.3 Disadvantages
 - 2.3.9.4 Applications and Market Demand
- 2.3.10 ANPz (Aminonitropiperazine)
 - 2.3.10.1 Description and Manufacture
 - 2.3.10.2 Advantages
 - 2.3.10.3 Disadvantages
 - 2.3.10.4 Applications and Market Demand
- 2.3.11 HNIW (Hexanitrohexaazaisowurtzitane)
 - 2.3.11.1 Description and Manufacture
 - 2.3.11.2 Advantages
 - 2.3.11.3 Disadvantages
 - 2.3.11.4 Applications and Market Demand
- 2.3.12 ONC (Octanitrocubane)
 - 2.3.12.1 Description and Manufacture
 - 2.3.12.2 Advantages
 - 2.3.12.3 Disadvantages
 - 2.3.12.4 Applications and Market Demand
- 2.4 Manufacturing processes and technologies

3 MARKETS AND APPLICATIONS

3.1 Military and defense

3.1.1 Overview

3.1.2 Warheads

3.1.3 Ammunition

3.1.4 Boosters

3.1.5 Detonators and Initiators

3.1.6 Blasting Caps and Primers

3.1.7 Torpedoes and Mines

3.1.8 Military Demolition

3.1.9 Energetic Composites

3.1.10 Unmanned Combat Vehicles and Smaller Weapon Systems

3.1.11 Drones

3.1.12 Application by energetic material type

3.2 Aerospace and space exploration

3.2.1 Overview

3.2.2 Rocket Propulsion

3.2.3 Gas Generators and Pyrotechnic Devices

3.2.4 Explosive Bolts and Separation Mechanisms

3.2.5 Airbag Deployment Systems

3.2.6 Spacecraft Thrusters

3.3 Mining and quarrying

3.3.1 Overview

3.3.2 Quarrying

3.3.3 Metal Mining

3.3.4 Coal Mining

3.3.5 Non-Metal Mining

3.3.6 Application by energetic material type

3.4 Construction and demolition

3.4.1 Overview

3.4.2 Building Demolition

3.4.3 Concrete and Rock Breaking

3.4.4 Underwater Demolition

3.4.5 Explosive Cutting

3.4.6 Blasting Capsules

3.4.7 Application by energetic material type

3.5 Oil and gas

3.5.1 Overview

3.5.2 Oil well perforating charges

- 3.5.3 Oil and Gas Well Stimulation
- 3.5.4 Geophysical Exploration
- 3.5.5 Application by energetic material type
- 3.6 Pyrotechnics
 - 3.6.1 Overview
 - 3.6.2 Fireworks
 - 3.6.3 Signal Flares
 - 3.6.4 Explosive Tracers
 - 3.6.5 Special Effects
 - 3.6.6 Application by energetic material type
- 3.7 Other applications
 - 3.7.1 Shockwave Generators
 - 3.7.2 Additive Manufacturing
 - 3.7.3 Medical Research

4 MARKET ANALYSIS

- 4.1 Regulations
 - 4.1.1 United States
 - 4.1.2 Europe
 - 4.1.3 Asia-Pacific
 - 4.1.3.1 China
 - 4.1.3.2 Japan
 - 4.1.3.3 South Korea
 - 4.1.3.4 Australia
 - 4.1.3.5 India
 - 4.1.3.6 Singapore
- 4.2 Price and Cost Analysis
 - 4.2.1 Market prices
- 4.3 Supply Chain and Manufacturing
 - 4.3.1 Supply chain for energetic materials
 - 4.3.2 Export and intra-country supply chains
- 4.4 Competitive Landscape
 - 4.4.1 Market players
 - 4.4.1.1 North America
 - 4.4.1.2 China
 - 4.4.1.3 Rest of Asia-Pacific
 - 4.4.1.4 Europe
 - 4.4.1.5 Rest of the World

4.5 Technological Advancements

4.5.1 Nanomaterials

4.5.2 Green Energetics

4.5.3 Advanced Formulations

4.5.4 Safety and Sensitivity Studies

4.5.5 Advanced Synthesis Techniques

4.5.6 Biological and Bioengineering Approaches

4.5.7 Additive Manufacturing

4.5.8 Advancements in Theoretical Modeling, Artificial Intelligence (AI), and Machine Learning

4.5.9 Green and Insensitive Energetic Materials

4.5.10 Advanced Propulsion Systems

4.6 Customer Segmentation

4.7 Geographical Markets

4.7.1 United States

4.7.2 China

4.7.3 India

4.7.4 Rest of Asia-Pacific

4.7.5 Australia

4.7.6 Russia

4.7.7 Middle East

4.7.8 Europe

4.7.9 Latin America

4.8 Addressable Market Size

4.8.1 Risks and Opportunities

4.9 Market Size and Growth

4.9.1 Tons

4.9.2 Revenues

4.9.3 By region (tons)

4.10 Future Outlook

5 COMPANY PROFILES (38 COMPANY PROFILES)

6 RESEARCH METHODOLOGY

I would like to order

Product name: The Global Market for Energetic Materials 2024-2035

Product link: <https://marketpublishers.com/r/GA9C12833E87EN.html>

Price: US\$ 1,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/GA9C12833E87EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
