

The Global Nanomaterials Market to 2025

<https://marketpublishers.com/r/G956F2DD57DEN.html>

Date: August 2016

Pages: 554

Price: US\$ 2,320.00 (Single User License)

ID: G956F2DD57DEN

Abstracts

Nanomaterials (also called nanoparticles or nanopowders) are increasingly becoming part of our daily lives. Their novel properties, that are not apparent in larger forms of the same material, has led to their desirability and exploitation in a wide range of applications.

Nanomaterials can be defined as substances that are intentionally produced, manufactured or engineered to have specific properties and one or more dimensions typically between 1 and 100 nanometres. Most nanomaterials are produced in multi-ton volumes in varying sizes, shapes, and also in surface coatings. Nanomaterials cover a range of materials inorganic metal and metal oxide nanomaterials, carbon-based nanomaterials and polymeric particulate materials in a variety of forms. Markets nanomaterials ? are currently impacting include healthcare, sporting goods, cosmetics and personal care, automotive, food and beverage, home and garden, coatings in numerous sectors, consumer electronics and computing. Paints and coatings cross-apply to numerous consumer markets from aerospace and automotive to construction and hygiene. They offer a range of functionalities that are desirable in a number of sectors such as anti-bacterialism, anti-corrosion, easy-clean, thermal barrier, protective and UV-absorbent and combinations thereof. The 554? page page report ???The Global Nanomaterials Market, 2010-2025??? offers a unique insight into this critical market.
