## Abstracts

Iontronics is an emerging technology that utilizes ionic rather than electronic conduction to achieve efficient solid

state devices. The field has has potential for enabling compact neuromorphic architectures and biomedical devices

if technical challenges can be overcome through ongoing R&D. Applications can be found in:

biocompatible or biodegradable logic circuits for sensing

chemical & gas sensors

brain-machine interfacing

biomimetic information processing

printed flexible batteries

healthcare monitoring

water treatment

thermoelectrics

flexible electronics & soft robotics.

Benefits compared to electronics include higher speed, lower power consumption, and high density integration.

Iontronic devices mimic synaptic plasticity and spiking neurons, enabling neuromorphic computing architectures.

This market assessment report provides a comprehensive analysis of the emerging iontronics technology market.

The report covers key technical aspects including materials, devices like memristors and sensors, and fabrication

methods. Applications across energy storage, neuro-inspired computing, flexible electronics, chemical sensing,

water treatment, thermoelectrics and other areas are assessed in detail.

The report includes an IP landscape analysis and profiles key research. Commercial prospects are evaluated with

addressable market size forecasts across segments, SWOT analysis, and a technology roadmap.

The report helps materials suppliers, device manufacturers, electronics OEMs, investors and researchers gain a

holistic understanding of the iontronics technology landscape and ecosystem. The insights aim to support strategic

decisions around R&D investments, IP development, partnerships, and evaluating adoption risks and benefits as

iontronics progresses towards commercialization.

## Contents

### 1 INTRODUCTION

- 1.1 What are iontronics?
- 1.2 Working principles
- 1.3 Key materials
  - 1.3.1 Polymer electrolytes
  - 1.3.2 Glass electrolytes
  - 1.3.3 Ceramic electrolytes
  - 1.3.4 Liquid crystals
  - 1.3.5 Hybrid organic-inorganic
  - 1.3.6 Metal hydrides
  - 1.3.7 Metal organic frameworks (MOFs)
  - 1.3.8 Carbon nanomaterials
  - 1.3.9 Ionic liquids
  - 1.3.10 Conductive polymers
- 1.4 Benefits

### 2 IONTRONICS DEVICES

- 2.1 Ionic diodes
  - 2.1.1 Description
  - 2.1.2 Applications
  - 2.1.3 Challenges
- 2.2 Ionic transistors
  - 2.2.1 Description
  - 2.2.2 Applications
  - 2.2.3 Challenges
- 2.3 Ionic memories
  - 2.3.1 Description
  - 2.3.2 Applications
  - 2.3.3 Challenges
- 2.4 Ionic sensors
  - 2.4.1 Description
  - 2.4.2 Applications
  - 2.4.3 Challenges
- 2.5 Other devices

### **3 FABRICATION TECHNIQUES**

- 3.1 Thin film deposition
- 3.2 Printing
- 3.3 Self-assembly
- 3.4 Emerging fabrication methods

### **4 APPLICATIONS**

- 4.1 Energy storage
  - 4.1.1 Market overview
  - 4.1.2 Printed flexible batteries
  - 4.1.3 Ionogels and ionic liquids in supercapacitors
- 4.2 Neuroinspired computing
  - 4.2.1 Market overview
  - 4.2.2 Ionic memristors and oscillators
- 4.3 Biomedical devices
  - 4.3.1 Market overview
  - 4.3.2 Biointerfaces
  - 4.3.3 Flexible iontronic bioelectronics
  - 4.3.4 Healthcare monitoring
- 4.4 Sensors
  - 4.4.1 Market overview
  - 4.4.2 Chemical and gas sensors
- 4.5 Flexible electronics & soft robotics
  - 4.5.1 Market overview
  - 4.5.2 Ionic skin
  - 4.5.3 Human Machine Interface (HMI)
- 4.6 Artificial intelligence
  - 4.6.1 Market overview
  - 4.6.2 Applications
- 4.7 Water Treatment
  - 4.7.1 Market overview
  - 4.7.2 Ion conducting membranes
- 4.8 Thermoelectrics
  - 4.8.1 Market overview
  - 4.8.2 Applications

### **5 IP ANALYSIS AND PATENT LANDSCAPE**

## **6 COMMERCIAL PROSPECTS**

6.1 SWOT analysis

6.2 Addressable markets

6.3 Roadmap

6.4 Future outlook

## **7 RESEARCH METHODOLOGY**

## **8 REFERENCES**

## List Of Tables

### LIST OF TABLES

Table 1. Key materials in iontronics-properties and applications.

Table 2. Benefits of iontronic materials.

Table 3. Main types of iontronic devices and their functionality:

Table 4. Summary of other types of iontronic devices.

Table 5. Comparison of fabrication techniques for iontronics.

Table 6. Emerging iontronic fabrication methods.

Table 7. Addressable markets for iontronics.

## List Of Figures

### LIST OF FIGURES

- Figure 1. Ionic transistor schematic.
- Figure 2. Neuromorphic Computing.
- Figure 3. Iontronic biointeface delivery.
- Figure 4. Iontronic flexible sensor.
- Figure 5. Iontronic pressure sensor.
- Figure 6. Patent applications for iontronics 2018-2022.
- Figure 7. SWOT anlysis: Iontronics.
- Figure 8. Iontronics applications roadmap.

## I would like to order

Product name: Iontronics: Market assessment

Product link: <https://marketpublishers.com/r/l47C477CEC0CEN.html>

Price: US\$ 400.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
