## Abstracts

Upon purchase the report includes a Free 12 month update.

The world microscopes market, encompassing optical (light), electron and scanning probe microscopes, generated an estimated \$2.35 billion in sales in 2010. The market is expected to grow to \$5.4 billion in 2017, an estimated CAGR of 10.96% from 2010 to 2017.

Increased government and corporate funding in life sciences, materials research and nanotechnology is leading to sustained growth in microscopy. Optical microscopes currently account for over 75% of the microscopy market but will lose market share to electron and scanning probe microscopes in the coming years. The largest end user market for microscopy is semiconductors, followed by life sciences, materials science and nanotechnology.

This new 104 page report from Future Markets, Inc. includes:

- In-depth analysis of the world optical (light), electron and scanning probe microscopes market

- Analysis of market structure, trends, drivers and challenges in microscopy

- Sales in microscopy by instrument types, by region and by end user markets, 2004-2017

- Market share and revenues of the major players in microscopy

- In-depth look at semiconductors, life sciences, materials science and nanotechnology end user markets for microscopy plus additional markets
