Abstracts

AS9100 Rev C Small Business Package offers everything a small business needs to become AS9100C certified. This AS 9100 Rev C Training course provides introductory AS 9100 training for employees, and includes audio, quizzes and a certificate.

Educates employees on:

What is an AS9100 Rev C Quality Management System?

Why is the organization involved with AS 9100 Rev C?

What does AS9100 Rev C require?

How does it impact me and how can I impact quality?

What and why are people auditing?

It gives you everything you need to prepare for registration. But if you don't plan to train your internal auditors, the Small Business Package is tailored especially for you. Some companies don't need to train their internal auditors because

There are trained auditors on staff

They will be trained elsewhere

An outside consultant will perform the audits, at least for the first year

There are not enough employees to perform internal audits (NOTE: AS9100C

does not allow someone to audit their own work)

With this AS9100C Small Business Package your end product will be a quality system that works for you and helps your company continually improve its processes and customer satisfaction.

Package has been used by companies across the globe since 2001

Has never failed an audit

Auditors love the efficient and effective design

Major OEM's and Registrars recommend our product!

Save time:

The documented Quality Management System (QMS) is organized for you. You won't have to face a blank page or figure out what is required. Quality Manual, Procedures & Forms are fully written and ready for you to customize. They contain guidance so you know what to edit and examples are provided.

Save money:

No need to hire consultants to develop your system or to train your employees.

Our training will teach you the requirements of the standard and how to implement them.

Train your employees in house. You can choose to train them yourself like a pro with the PowerPoint training complete with trainer's guide and detailed speaker's notes. Or, let your employees self-train with convenient online training.

Contents

It contains the following areas:

Introduction to AS9100 –Rev C

What is AS9100?

What does a company need to do to Register to

What are the requirements?

What are the next steps for certification?

AS 9100 Rev C Quality Systems Manual

This manual describes the Quality Management System, delineates authorities, inter relationships and responsibilities of the personnel responsible for performing within the system. The manual also provides procedures or references for all activities comprising the Quality Management System to ensure compliance to the necessary requirements of the standard.

This manual is used internally to guide the company's employees through the various requirements of the AS 9100 standard that must be met and maintained in order to ensure customer satisfaction, continuous improvement and provide the necessary instructions that create an empowered work force.

This manual is used externally to introduce our Quality Management System to our customers and other external organizations or individuals. The manual is used to familiarize them with the controls that have been implemented and to assure them that the integrity of the Quality Management System is maintained and focused on customer satisfaction and continuous improvement.
