Abstracts

An integrated management system (IMS) combines all related components of a business into one system for easier management and operations. Quality (QMS), Environmental (EMS), and Safety (OHSMS) management systems are often combined and managed as an IMS.

OHSAS 18001 Occupational Health & Safety Management System was intentionally developed to be compatible with the ISO 9001 (Quality) and ISO 14001 (Environmental) management systems standards for easier integration of quality, environmental and occupational health & safety management systems by organizations. OHSAS 18001 outlines requirements for an occupational health and safety (OH&S) management system, to enable an organization to control its OH&S risks and improve its performance. Like ISO 14001, it does NOT state performance criteria or dictate the design of a management system. Integrating an IMS can be more effective and efficient than maintaining individual systems.

ISO 9001 is a Quality Management System (QMS) which gives organizations a systematic approach for meeting customer objectives.

ISO 14001 is an Environmental Management System (EMS) which provides a system for measuring and improving an organization's environmental impact.

OHSAS 18001 is an Occupational Health and Safety Management System (OHSMS) which provides a system for measuring and improving an organization's health and safety impact.

One important difference between OHSAS 18001, ISO 14001 and other international

standards is that an organization can self-declare their compliance. Learn More...

Because ISO 14001 and OHSAS 18001 are very similar, the management systems can be effectively combined, integrated and a self-declaration made (a cost savings option).

ISO 9001-14001-18001 comparison

There are seven common elements in ISO 9001, ISO 14001 and OHSAS 18001:

Structure and responsibility

Training, awareness and competence

Document control

Records

Corrective and preventive action

Internal audits

Management review

An IMS takes advantage of these common elements and implementation of 14001 and 18001 is simplified into an existing ISO 9001 certified organization.

ISO 14000 & 18000 are very similar to each other but differ from ISO 9001:

Structure

ISO 14000 and 18000 contains four clauses with six elements

ISO 9001 contains five clauses with twenty-three elements

Despite a common systems approach, they differ in content.

In addition, ISO 14000 contains the following unique requirements:

Environmental Aspects and Impacts (4.3.1)

Legal and Other Requirements (4.3.2)

Environmental Programs (4.3.4)

Communication (4.4.3)

Emergency Preparedness and Response (4.4.7)

Integration Options

There are three primary options the organization must choose between:

Maintaining two separate systems (9001 and 14001/18001)

Partially integrated systems

Fully integrated systems

Advantages of ISO 9001-14001-OHSAS 18001 All-in-One package

Saves time:

The documented Integrated Management System (IMS) is organized. IMS Manual, Procedures & Forms are fully written and ready for you to customize. They contain guidance so you know what to edit and examples are provided.

Saves money:

There is no need to hire consultants to develop your system or to train your employees. The training offered by ISO will teach you the requirements of the standard and how to implement them.

Organizations can train their employees in house.

The ISO 9001-14001-OHSAS 18001 All-in-One package can be implemented in the following manners:

Plan: The basic requirements, at the planning stage, are that Objectives and a Work Program have been set in place

Do: A simple approach, using simple tools, needed to be taken so as to gain wide acceptance during the execution stage and to avoid duplication

Check The 'Check' stage is all about evaluation of the management system

Act: Gathering all the results of the planning, doing and checking steps and reviewing management actions.

Contents

It contains the following areas:

4.2 Documentation Requirements

4.2.1 General

4.2.2 Quality, Environmental and OH&S manual

4.2.3 Control of documents

8.5 Improvement

8.5.1 Continual improvement

8.5.2 Corrective action

8.5.3 Preventive action

QMS Section 8 - Related Documents

ISO 14001:2004 Environmental Management System

SECTION 4.3 PLANNING
