Abstracts

Certification to OHSAS 18001 is the guarantee that an organization is taking continuous steps to ensure it complies and stays up to date with appropriate legislation and becomes a safer place to work. OHSAS 18001 is the internationally recognized standard for best practice occupational health & safety management.

The OHSAS 18001 All in One Doc Workbook Tools package ensures that your end product will be a health & safety management system that works for you and helps your company continually improve its processes and customer satisfaction. The OHSAS 18001 All in One Doc Workbook Tools package has been used by companies across the globe, has never failed an audit, and has an efficient and effective design

Advantages of OHSAS 18001 All in One Doc Workbook Tools package

Cost savings through reducing or eliminating costs associated with work-related injuries or illness

Enables measurement of health and safety performance by establishing a framework for controlling and measuring health and safety performance

Improved corporate image by demonstrating the organization's commitment to addressing H&S issues to employees, customer, shareholders and other stakeholders

Helps reduce the occurrence of accidents and incidences

Helps you stay abreast of relevant legislation and reduces the likelihood of

prosecution and fines

Demonstrates a commitment to assuring the safety of employees and the wider public

In addition, lost time due to incidents and ill health can be reduced, along with reputational damage resulting from a poor H&S track record. Holding OHSAS 18001 All in One Doc Workbook Tools package certification also provides new opportunities to win business where certification is a condition of supply.

The need for certification to OHSAS 18001

Certification to OHSAS 18001 All in One Doc Workbook Tools package demonstrates, both internally and externally, a commitment to maintain or improve the way in which you manage health and safety within your small business organization.

Setting targets through an organizational health and safety policy, together with ongoing measurement against it, supports a process of continual improvement, enabled by the standard's 'Plan, Do, Check, Act' framework.

Plan: identify and address risks, including setting and planning for objectives and changes to support continual improvement

Do: Controls need to be identified for OHSAS, requirements need to be identified, designs developed, controls placed on externally provided processes, products and services

Check: monitor, measure, analyze and evaluate the products or services to ensure they meet requirements, the processes used are adequate and effective, and customer satisfaction is being met

Act: Action in this case involves the actions needed to address any issues found in the check step
