Abstracts

1,8-Diaminonaphthalene, or 1,8-DAN, is an organic compound with the formula $C_{10}H_6(NH_2)_2$. This compound is a diamine in which the two dimethylamino groups are attached on the same side or peri position of a naphthalene system. 1,8-DAN is primarily used as intermediates in the production of solvent dyes, such as C.I.Solvent Red 135, C.I.Solvent Orange 60. 1,8-DAN is also a precursor to 1,8-bis(dimethylamino)naphthalene (Proton Sponge, Sigma-Aldrich), one of the strongest organic bases. Prices of 1,8-diaminonaphthalene (1,8-DAN) over the past 12 months have exhibited a roller coaster pattern of highs (upto 90,000 USD/ton) and lows. Prices have been affected by major factors, such as drop in demand of 1,5-diaminonaphthalene (a by-product of 1,8-DAN), vicious competition among Chinese major producers, etc. According to Gen Consulting Company, global 1,8-diaminonaphthalene (1,8-DAN) market is expected to grow by USD 2.37 million during 2020-2026 progressing at a CAGR of 9% during the forecast period.
