Abstracts

The 3D printing wearables are revolutionizing several industries, particularly the medical industry. Wearable devices that track patient data are saving lives and helping patients improve at a faster pace. The advent of 3D printing wearables has tremendously helped elevate the efficiency of the healthcare industry. It has improved the doctor-patient relationship to be ongoing and quicker at resolving health issues, thanks to wearables that transmit patient data to the hospital in real-time. The global 3D printed wearables market is expected to increase by USD 2.1 billion, at a compound annual growth rate (CAGR) of 9.1% from 2023 to 2029, according to the latest edition of the Global 3D Printed Wearables Market Report.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global 3D printed wearables market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, end user, and region. The global market for 3D printed wearables can be segmented by product: fitness trackers, orthopedic implants, prosthetics, smart watches, surgical instruments. The prosthetics segment was the largest contributor to the global 3D printed wearables market in 2022. 3D printed wearables market is further segmented by end user: academia and research institutes, hospitals and clinics, pharmaceutical & biotech companies, others. According to the research, the academia and research institutes segment had the largest share in the global 3D printed wearables market. Based on region, the 3D printed wearables market is segmented into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. North America held the largest revenue share in 2022.

Market Segmentation

By product: fitness trackers, orthopedic implants, prosthetics, smart watches, surgical instruments

By end user: academia and research institutes, hospitals and clinics, pharmaceutical & biotech companies, others

By region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America

The report also provides analysis of the key companies of the industry and their detailed company profiles including 3D Systems Corporation, Arcam AB, Carbon Inc., Cyfuse Biomedical K.K., EnvisionTEC, Inc., EOS GmbH, Koninklijke Philips N.V., Materialise N.V., Omron Corporation, Prodways Group SA, Renishaw plc, Stratasys limited, Zephyr Technology Corporation (Medtronic plc), among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global 3D printed wearables market.

To classify and forecast the global 3D printed wearables market based on product, end user, region.

To identify drivers and challenges for the global 3D printed wearables market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global 3D printed wearables market.

To identify and analyze the profile of leading players operating in the global 3D printed wearables market.

Why Choose This Report

Gain a reliable outlook of the global 3D printed wearables market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints

PART 5. MARKET BREAKDOWN BY PRODUCT

Fitness trackers
Orthopedic implants
Prosthetics
Smart watches
Surgical instruments

PART 6. MARKET BREAKDOWN BY END USER

Academia and research institutes
Hospitals and clinics
Pharmaceutical & biotech companies
Others

PART 7. MARKET BREAKDOWN BY REGION

North America

Europe
Asia-Pacific
MEA (Middle East and Africa)
Latin America

PART 8. KEY COMPANIES

3D Systems Corporation

Arcam AB

Carbon Inc.

Cyfuse Biomedical K.K.

EnvisionTEC, Inc.

EOS GmbH

Koninklijke Philips N.V.

Materialise N.V.

Omron Corporation

Prodways Group SA

Renishaw plc

Stratasys limited

Zephyr Technology Corporation (Medtronic plc)
