Abstracts

Acne is a skin condition that occurs when your hair follicles become plugged with oil and dead skin cells. It causes whiteheads, blackheads or pimples. Acne is most common among teenagers, though it affects people of all ages. Garnering a CAGR of 5.1% from 2022 to 2028, the global acne treatment market is projected to reach worth of USD 8,690 million by 2028-end, according to a new report by Gen Consulting Company. Increasing sedentary lifestyle and unhealthy food habits, increasing prevalence of acne and facial skin diseases, rise in adoption of skin care products, growing acne cases in geriatric population are expected to boost the market growth in the coming years. Increasing sedentary lifestyle and unhealthy food habits, increasing prevalence of acne and facial skin diseases, rise in adoption of skin care products, growing acne cases in geriatric population are expected to boost the market growth in the coming years.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global acne treatment market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the acne treatment industry.
