## Abstracts

As airports grow and their operations increase, they create more environmental impacts, but there are also opportunities to be more sustainable. A significant amount of waste is generated as a result of various activities carried out at airports, and this is considered to be one of the most important environmental issues of air transport. Airport waste management includes the vacuum toilet waste or wastewater from airplane lavatories that must be pumped out after each flight and disposed of. According to Gen Consulting Company, the global airport waste management market size is expected to increase from USD 1,587 million in 2021 to USD 1,965 million by 2028, garnering a CAGR of 3.1% over the evaluated period.
