Abstracts

The global automotive active health monitoring system market size is projected to grow by USD 5.5 billion from 2023 to 2029, registering a CAGR of 23.45 percent, according to the latest market data. The active health monitoring system can detect signs of fatigue, stress, or other health issues that may affect the driver's ability to operate the vehicle safely. The system can alert the driver to take a break, adjust the temperature, or take other actions to improve their comfort and well-being. The system can also be used to monitor the health of passengers, especially those with medical conditions that require monitoring. For example, the system can detect signs of a heart attack or stroke and alert emergency services if necessary. The active health monitoring system can detect signs of fatigue, stress, or other health issues that may affect the driver's ability to operate the vehicle safely. The system can alert the driver to take a break, adjust the temperature, or take other actions to improve their comfort and well-being. The system can also be used to monitor the health of passengers, especially those with medical conditions that require monitoring. For example, the system can detect signs of a heart attack or stroke and alert emergency services if necessary.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global automotive active health monitoring system market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the sales channel, vehicle type, application, and region. The global market for automotive active health monitoring system can be segmented by

sales channel: OEM, aftermarket. The OEM segment held the largest share of the global automotive active health monitoring system market in 2022 and is anticipated to hold its share during the forecast period. Automotive active health monitoring system market is further segmented by vehicle type: passenger cars, commercial vehicle. Globally, the passenger cars segment made up the largest share of the automotive active health monitoring system market. Based on application, the automotive active health monitoring system market is segmented into: pulse rate, open automotive active health monitoring system, blood sugar level, blood pressure, others. The pulse rate segment was the largest contributor to the global automotive active health monitoring system market in 2022. On the basis of region, the automotive active health monitoring system market also can be divided into: North America, Europe, Asia-Pacific, Rest of the World (RoW). Europe is estimated to account for the largest share of the global automotive active health monitoring system market.

Market Segmentation

By sales channel: OEM, aftermarket

By vehicle type: passenger cars, commercial vehicle

By application: pulse rate, open automotive active health monitoring system, blood sugar level, blood pressure, others

By region: North America, Europe, Asia-Pacific, Rest of the World (RoW)

The global automotive active health monitoring system market report offers detailed information on several market vendors, including Tata Elxsi Ltd., Acellent Technologies, Inc., Qualcomm Technologies, Inc., Kritikal Solutions Pvt. Ltd., Faurecia SE, Plessey Semiconductors plc, among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global automotive active health monitoring system market.

To classify and forecast the global automotive active health monitoring system market based on sales channel, vehicle type, application, region.

To identify drivers and challenges for the global automotive active health monitoring system market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global automotive active health monitoring system market.

To identify and analyze the profile of leading players operating in the global automotive

active health monitoring system market.

Why Choose This Report

Gain a reliable outlook of the global automotive active health monitoring system market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints

PART 5. MARKET BREAKDOWN BY SALES CHANNEL

OEM
Aftermarket

PART 6. MARKET BREAKDOWN BY VEHICLE TYPE

Passenger cars
Commercial vehicle

PART 7. MARKET BREAKDOWN BY APPLICATION

Pulse rate
Open automotive active health monitoring system
Blood sugar level
Blood pressure
Others

PART 8. MARKET BREAKDOWN BY REGION

North America

Europe

Asia-Pacific

Rest of the World (RoW)

PART 9. KEY COMPANIES

Tata Elxsi Ltd.

Acellent Technologies, Inc.

Qualcomm Technologies, Inc.

Kritikal Solutions Pvt. Ltd.

Faurecia SE

Plessey Semiconductors plc
