Abstracts

According to Gen Consulting Company, global automotive camera lenses market is expected to grow at a CAGR of 27.59% over the forecast period 2020-2026. Increasing number of the road accidents, shift in consumer preferences towards vehicle safety and rise in stringent government regulations imposed by several legislative bodies have made automotive cameras an essential part of the vehicle. Further, the continuous development in the camera technology, reduction in cost of the camera modules among others are fueling the growth of automotive cameras. In addition to this the car insurance companies are playing a vital role in widespread adoption of cameras in the automobiles. These drivers have high impact on the global automotive camera lenses market and will keep driving the growth of the automotive camera lenses market during the forecast period.
